Contents

- 1 Introduction** **1**
 - 1.1 Complexity of financial markets 1
 - 1.1.1 Financial markets as complex systems 1
 - 1.1.2 The complex dynamics of financial markets 5
 - 1.2 Motivation and methodology 7

- 2 Empirical Observations and Limitations of Traditional Economic Theories** **9**
 - 2.1 Stylized facts observed in financial markets 9
 - 2.1.1 Stock markets 10
 - 2.1.2 Options markets 13
 - 2.2 Empirically consistent models 18
 - 2.2.1 Models of price dynamics 18
 - 2.2.2 Option pricing models 19
 - 2.3 Problems of standard financial theories 25
 - 2.3.1 Adoption of unrealistic assumptions 26
 - 2.3.2 Evasion of endogenous mechanisms 29

- 3 Modern Approaches to Financial Modeling: Heterogeneity, Irrationality and Interactions** **32**
 - 3.1 Behavioral finance 32
 - 3.1.1 Stock markets 36
 - 3.1.2 Options markets 36
 - 3.2 Agent-based simulation 37
 - 3.2.1 Stock markets 40

3.2.2	Options markets	43
3.3	Econophysics	45
4	Understanding Stock Market Dynamics	49
4.1	A cellular automaton model of stock markets	50
4.1.1	Level I model	51
4.1.2	Level II model	52
4.1.3	Level III model	53
4.1.4	Rule of price updating	55
4.2	Simulation results	57
4.2.1	Simulation results of the Level I model	57
4.2.2	Simulation results of the Level II model	58
4.2.3	Simulation results of the level III model	58
4.3	Discussion: The market dynamics revealed by the model	63
4.3.1	Long-range interactions can emerge from local interactions	65
4.3.2	Price and volatility are mean-reverting	67
4.3.3	Heavy tails due to large price variations are caused by imitations	69
4.3.4	Volatility clustering is related to the evolution of trading activity	71
4.3.5	The regularity can be identified in some other microsimulation models	73
4.4	Conclusions	74
5	Why Do Options Markets Smile?	76
5.1	A microsimulation model of options markets	77
5.1.1	S model: The market consists of only speculators	78
5.1.2	SA model: The market consists of both speculators and arbitrageurs	79
5.1.3	SAL model: Difference in liquidity is included	80
5.2	Simulation results	81
5.2.1	Shapes of the implied volatility curves	81
5.2.1.1	Implied volatility curves from the S model	82
5.2.1.2	Implied volatility curves from the SA model	82

5.2.1.3	Implied volatility curves from the SAL model . . .	82
5.2.2	Dynamical properties of the implied volatility curves . . .	83
5.3	Discussion: The mechanism underlying the smile phenomenon . . .	85
5.3.1	Competing effect induced by heterogeneous trading behavior	85
5.3.2	Shapes of implied volatility curves corresponding to different types of uncertainty	87
5.3.3	Driving factors in the fluctuations of implied volatility curves.	88
5.4	Robustness study	91
5.4.1	Reactions of the implied volatility curve to speculations using the Black-Scholes model	91
5.4.2	Sensitivity analysis of the implied volatility dynamics . . .	93
5.5	Conclusions	94
6	Effects of Heterogeneous Speculative Strategies on the Volatility Smile	95
6.1	Modeling heterogeneous speculators	96
6.1.1	Directional spread speculation	96
6.1.2	Butterfly spread speculation	97
6.2	Effects on the volatility smile	100
6.2.1	Directional spread speculators	100
6.2.2	Butterfly spread speculators	101
6.3	Analysis of the trading volumes	102
6.4	Conclusions	104
7	Conclusions and Future Prospects	106
7.1	Concluding discussion	106
7.1.1	Answers to the research questions	106
7.1.2	Complex dynamics can emerge from simple behavior . . .	108
7.1.3	Microsimulation: Necessity and difficulty	109
7.1.3.1	Microscopic modeling is necessary for understanding market dynamics	109
7.1.3.2	Difficulty in implementing microsimulations . . .	110
7.2	Future work	111
7.2.1	Multiscale modeling of financial markets	112

7.2.2 Applications to practice	112
A A detailed description of the options market model	114
A.1 The rule of option price updating	114
A.2 The dynamic aspect of speculators' behavior	114
A.3 The parameter values	115
B Analytical solution for a special case of the options market model	118
C Levels of trading activity of different speculators	120
Bibliography	132
Glossary	133
Publications	134
Summary	135
Samenvatting	138
Acknowledgements	141
