# Contents

1 Introduction .................................................. 1
   1.1 Complexity of financial markets .......................... 1
       1.1.1 Financial markets as complex systems ................. 1
       1.1.2 The complex dynamics of financial markets .......... 5
   1.2 Motivation and methodology .............................. 7

2 Empirical Observations and Limitations of Traditional Economic Theories 9
   2.1 Stylized facts observed in financial markets .............. 9
       2.1.1 Stock markets ...................................... 10
       2.1.2 Options markets ................................... 13
   2.2 Empirically consistent models ............................ 18
       2.2.1 Models of price dynamics ............................ 18
       2.2.2 Option pricing models .............................. 19
   2.3 Problems of standard financial theories ................... 25
       2.3.1 Adoption of unrealistic assumptions ................ 26
       2.3.2 Evasion of endogenous mechanisms .................. 29

3 Modern Approaches to Financial Modeling: Heterogeneity, Irrationality and Interactions 32
   3.1 Behavioral finance ........................................ 32
       3.1.1 Stock markets ...................................... 36
       3.1.2 Options markets ................................... 36
   3.2 Agent-based simulation ................................... 37
       3.2.1 Stock markets ...................................... 40
4 Understanding Stock Market Dynamics

4.1 A cellular automaton model of stock markets

4.1.1 Level I model

4.1.2 Level II model

4.1.3 Level III model

4.1.4 Rule of price updating

4.2 Simulation results

4.2.1 Simulation results of the Level I model

4.2.2 Simulation results of the Level II model

4.2.3 Simulation results of the level III model

4.3 Discussion: The market dynamics revealed by the model

4.3.1 Long-range interactions can emerge from local interactions

4.3.2 Price and volatility are mean-reverting

4.3.3 Heavy tails due to large price variations are caused by imitations

4.3.4 Volatility clustering is related to the evolution of trading activity

4.3.5 The regularity can be identified in some other microsimulation models

4.4 Conclusions

5 Why Do Options Markets Smile?

5.1 A microsimulation model of options markets

5.1.1 S model: The market consists of only speculators

5.1.2 SA model: The market consists of both speculators and arbitrageurs

5.1.3 SAL model: Difference in liquidity is included

5.2 Simulation results

5.2.1 Shapes of the implied volatility curves

5.2.1.1 Implied volatility curves from the S model

5.2.1.2 Implied volatility curves from the SA model
CONTENTS

5.2.1.3 Implied volatility curves from the SAL model . . 82
5.2.2 Dynamical properties of the implied volatility curves . . 83
5.3 Discussion: The mechanism underlying the smile phenomenon . . 85
  5.3.1 Competing effect induced by heterogeneous trading behavior 85
  5.3.2 Shapes of implied volatility curves corresponding to different types of uncertainty 87
  5.3.3 Driving factors in the fluctuations of implied volatility curves 88
5.4 Robustness study 91
  5.4.1 Reactions of the implied volatility curve to speculations using the Black-Scholes model 91
  5.4.2 Sensitivity analysis of the implied volatility dynamics 93
5.5 Conclusions 94

6 Effects of Heterogeneous Speculative Strategies on the Volatility Smile
  6.1 Modeling heterogeneous speculators 96
    6.1.1 Directional spread speculation 96
    6.1.2 Butterfly spread speculation 97
  6.2 Effects on the volatility smile 100
    6.2.1 Directional spread speculators 100
    6.2.2 Butterfly spread speculators 101
  6.3 Analysis of the trading volumes 102
  6.4 Conclusions 104

7 Conclusions and Future Prospects 106
  7.1 Concluding discussion 106
    7.1.1 Answers to the research questions 106
    7.1.2 Complex dynamics can emerge from simple behavior 108
    7.1.3 Microsimulation: Necessity and difficulty 109
      7.1.3.1 Microscopic modeling is necessary for understanding market dynamics 109
      7.1.3.2 Difficulty in implementing microsimulations 110
    7.2 Future work 111
      7.2.1 Multiscale modeling of financial markets 112

v
# CONTENTS

7.2.2  Applications to practice ........................................ 112

A  A detailed description of the options market model .............. 114
   A.1  The rule of option price updating ................................. 114
   A.2  The dynamic aspect of speculators’ behavior ................... 114
   A.3  The parameter values ............................................. 115

B  Analytical solution for a special case of the options market model 118

C  Levels of trading activity of different speculators ................. 120
