# Contents

1 Introduction 1
   1.1 Complexity of financial markets 1
      1.1.1 Financial markets as complex systems 1
      1.1.2 The complex dynamics of financial markets 5
   1.2 Motivation and methodology 7

2 Empirical Observations and Limitations of Traditional Economic Theories 9
   2.1 Stylized facts observed in financial markets 9
      2.1.1 Stock markets 10
      2.1.2 Options markets 13
   2.2 Empirically consistent models 18
      2.2.1 Models of price dynamics 18
      2.2.2 Option pricing models 19
   2.3 Problems of standard financial theories 25
      2.3.1 Adoption of unrealistic assumptions 26
      2.3.2 Evasion of endogenous mechanisms 29

3 Modern Approaches to Financial Modeling: Heterogeneity, Irrationality and Interactions 32
   3.1 Behavioral finance 32
      3.1.1 Stock markets 36
      3.1.2 Options markets 36
   3.2 Agent-based simulation 37
      3.2.1 Stock markets 40
## CONTENTS

3.2.2 Options markets .............................................. 43
3.3 Econophysics .................................................. 45

4 Understanding Stock Market Dynamics 49
   4.1 A cellular automaton model of stock markets ................. 50
      4.1.1 Level I model .......................................... 51
      4.1.2 Level II model .......................................... 52
      4.1.3 Level III model .......................................... 53
      4.1.4 Rule of price updating .................................. 55
   4.2 Simulation results ........................................... 57
      4.2.1 Simulation results of the Level I model ............... 57
      4.2.2 Simulation results of the Level II model ............. 58
      4.2.3 Simulation results of the level III model .......... 58
   4.3 Discussion: The market dynamics revealed by the model .... 63
      4.3.1 Long-range interactions can emerge from local interactions 65
      4.3.2 Price and volatility are mean-reverting ................ 67
      4.3.3 Heavy tails due to large price variations are caused by imitations 69
      4.3.4 Volatility clustering is related to the evolution of trading activity 71
      4.3.5 The regularity can be identified in some other microsimulation models 73
   4.4 Conclusions .................................................. 74

5 Why Do Options Markets Smile? 76
   5.1 A microsimulation model of options markets ............... 77
      5.1.1 S model: The market consists of only speculators .... 78
      5.1.2 SA model: The market consists of both speculators and arbitrageurs .... 79
      5.1.3 SAL model: Difference in liquidity is included ...... 80
   5.2 Simulation results ........................................... 81
      5.2.1 Shapes of the implied volatility curves ............... 81
         5.2.1.1 Implied volatility curves from the S model .... 82
         5.2.1.2 Implied volatility curves from the SA model ... 82
