You will be contacted as soon as possible.

Acknowledgements

I would like to express my eternal gratitude to many people for guiding, teaching, advising, and supporting me in my PhD research.

Prof. Dr. Peter Sloot, my promoter, created and financed the PhD project, as well as guided and supported me as he did when I was still a Master student in the same group. I have been deeply impressed by his broad knowledge, pioneering spirit, and cultivated research taste.

Dr. Drona Kandhai, my daily supervisor and co-promotor, provided me with strict training and detailed guidance. I appreciated his patience and flexibility in our search for research directions. The most valuable thing I have learned from him, however, is his rigorous style of research.

Many colleagues in the Computational Science research group gave me all kinds of help. For many times, my text was checked by Breannán Ó Nualláin and my laptop was fixed by Quoc-Chinh Bui and Syed Murtaza. Some other colleagues who are not mentioned here have also facilitated the progress of my research, through technical support and scientific discussions.

My family made a special contribution to my PhD journey. Marjolein, my wife, did most of the housework so that I could put more energy into research. Lian, my daughter, spent her baby days exactly in my PhD period, and I felt that my scientific curiosity was further inspired by her lovely inquiring expressions.
