**Acknowledgments**

**1 Introduction**

1.1 Background ........................................ 2  
1.2 Overview of the Dissertation ....................... 6  
1.3 Origins of the Material ............................ 8  

**2 Preliminaries**

2.1 Finite Automata and Regular Expressions .......... 9  
2.2 Kripke Models and Bisimulation .................... 10  
2.3 Three Logics 
   2.3.1 Propositional Dynamic Logic .................. 13  
   2.3.2 Epistemic Temporal Logic  ....................... 15  
   2.3.3 Dynamic Epistemic Logic ....................... 15  

**I Logics of Epistemic Protocols**

**3 Meta-knowledge Matters**

3.1 Introduction ...................................... 21  
3.2 Preliminaries .................................... 22  
3.3 Announcement Protocol and Verification .......... 24  
3.4 Deterministic Protocols for RCP\textsubscript{3,3} .......... 29  
3.5 Conclusion and Discussion ........................ 34  

**4 Logics of Knowledge and Protocol Change**

4.1 Introduction ...................................... 37  
4.2 Basic Logic PDL\textsuperscript{\textdagger} .................. 39  
4.3 Public Event Logic PDL\textsuperscript{\textdagger} .......... 43  
4.4 Update Logic PDL\textsuperscript{\textdaggerdbl} .............. 49  
4.5 Conclusion and Future Work ....................... 55
## Dynamic Epistemic Modelling

### 5 Composing Models

- **5.1 Introduction**
- **5.2 Composing Static Models**
  - 5.2.1 Merging Composition
  - 5.2.2 Expansion
  - 5.2.3 Preservation
- **5.3 Decomposition
- **5.4 Composing Updates**
- **5.5 Discussion and Future Work**

### 6 Counting Models

- **6.1 Introduction**
- **6.2 Preliminaries**
- **6.3 Cardinality of the Tree Languages**
- **6.4 Normal Form of the Countable Languages**
- **6.5 Discussion and Future Work**

## Model Checking

### 7 Making Models Smaller

- **7.1 Introduction**
- **7.2 Preliminaries**
  - 7.2.1 Kripke Modal Labelled Transition System
  - 7.2.2 Three-valued Public Announcement Logic
- **7.3 Abstraction and Logical Characterization**
  - 7.3.1 Abstraction
  - 7.3.2 Logical Characterization
- **7.4 The Muddy Children and Abstraction**
- **7.5 Conclusion and Future work**

### 8 Accelerating the Transitions

- **8.1 Introduction**
- **8.2 Preliminaries**
  - 8.2.1 PDL on AKM
  - 8.2.2 Regular Expression Rewriting
- **8.3 Model Checking**
  - 8.3.1 A Reduction to Standard PDLμ Model Checking
  - 8.3.2 A Direct Algorithm
  - 8.3.3 Complexity Analysis
- **8.4 Axiomatization**
- **8.5 Satisfiability**
- **8.6 Conclusion and Future Work**
## IV  Modelling Security Protocols

### 9 Epistemic Approaches to Security Protocol Verification  
9.1 Knowledge in Security Protocols  
9.1.1 Different Aspects of Knowledge  
9.1.2 Tension Between Epistemic and Temporal Structure  
9.2 Epistemic Approaches: A Brief Survey  
9.2.1 BAN logic  
9.2.2 Basics of Epistemic Approaches  
9.2.3 Epistemic Temporal Approaches  
9.2.4 Dynamic Epistemic Logic Approaches  
9.2.5 Tools  
9.3 Comparisons  
9.3.1 On Equivalences  
9.3.2 ETL vs. DEL in Modelling  
9.4 To Know or Not, Towards a Technical Answer  
9.4.1 On Expressivity of ETL  
9.4.2 Model Checking ETL  
9.5 Conclusion  

### A Alloy Code for Russian Cards Problem (3.3.1)  

### Bibliography  

### Abstract  

### Samenvatting  

### Index
