## TABLE OF CONTENTS

1. General introduction and outline  
   *Based on: Nutrition and the circadian timing system.*  
   *Progress in Brain Research 2012;199:359-76*

2. Dim light at night disturbs the daily sleep-wake cycle in the rat  
   *Scientific Reports 2016;6:35662*

3. Acute effects of morning light on plasma glucose and triglycerides in healthy men and men with type 2 diabetes  
   *Journal of Biological Rhythms 2017. In press*

4. The diurnal rhythm of adipose tissue gene expression is reduced in obese patients with type 2 diabetes  
   *Submitted*

5. Postprandial plasma bile acid excursions in obese patients with type 2 diabetes are characterized by early peaks, despite normal diurnal rhythms

6. What’s the time: does the artificial pancreas need to know?  
   *Diabetes 2013;62:2173-4*

   *British Journal of Nutrition 2014;112:504-12*

8. Summary and general discussion

9. Appendices  
   *Author affiliations*  
   *Nederlandse samenvatting*  
   *PhD portfolio*  
   *Dankwoord*  
   *Curriculum Vitae*
