I Setting and Motivation 1
   1 Introduction 3
   2 Mathematical Prerequisites 11
      2.1 Learning Theory 11
         2.1.1 Finite Identification 13
         2.1.2 Identification in the Limit 14
         2.1.3 Other Paradigms 16
      2.2 Logics of Knowledge and Belief 18
         2.2.1 Epistemic Logic 18
         2.2.2 Doxastic Logic 23

II Learning and Definability 39
   4 Learning and Belief Revision 41
      4.1 Iterated Belief Revision 45
      4.2 Iterated DEL-AGM Belief Revision 49
4.2.1 Conditioning ................................. 50
4.2.2 Lexicographic Revision ......................... 51
4.2.3 Minimal Revision ............................. 53
4.3 Learning Methods .............................. 54
4.4 Belief-Revision-Based Learning Methods .......... 56
4.5 Convergence ................................ 59
4.6 Learning from Positive and Negative Data ........ 67
4.6.1 Erroneous Information ......................... 68
4.7 Conclusions and Perspectives ................... 71

5 Epistemic Characterizations of Identifiability 73
5.1 Learning and Dynamic Epistemic Logic .......... 74
5.1.1 Dynamic Epistemic Learning Scenarios ......... 74
5.1.2 Finite Identification in DEL .................. 75
5.1.3 Identification in the Limit and DDL .......... 78
5.2 Learning and Temporal Logic .................... 78
5.2.1 Event Models and Product Update ............... 79
5.2.2 Dynamic Epistemic Logic Protocols .......... 80
5.2.3 Dynamic Epistemic and Epistemic Temporal Logic . 80
5.2.4 Learning in a Temporal Perspective .......... 83
5.2.5 Finite Identifiability in ETL ................ 85
5.2.6 Identification in the Limit and DETL .......... 87
5.2.7 Further Questions on Protocols ............... 89
5.3 Conclusions and Perspectives ................... 90

III Learning and Computation 93

6 On the Complexity of Conclusive Update 95
6.1 Basic Definitions and Characterization .......... 97
6.2 Preset Learning ................................ 100
6.3 Eliminative Power and Complexity ............... 104
6.3.1 The Complexity of Finite Identifiability Checking . 105
6.3.2 Minimal Definite Finite Tell-Tale .......... 105
6.3.3 Minimal-Size Definite Finite Tell-Tale ......... 108
6.4 Preset Learning and Fastest Learning .......... 110
6.4.1 Strict Preset Learning ........................ 113
6.4.2 Finite Learning and Fastest Learning .......... 115
6.5 Conclusions and Perspectives ................... 117

7 Supervision and Learning Attitudes 119
7.1 Sabotage Games ................................. 120
7.2 Sabotage Modal Logic ........................... 124
7.3 Sabotage Learning Games ........................................... 125
  7.3.1 Three Variations ............................................... 125
  7.3.2 Sabotage Learning Games in Sabotage Modal Logic ...... 126
  7.3.3 Complexity of Sabotage Learning Games ...................... 129
7.4 Relaxing Strict Alternation ........................................... 133
7.5 Conclusions and Perspectives ..................................... 136

8 The Muddy Scientists .................................................... 139
  8.1 The Muddy Children Puzzle ........................................ 140
  8.2 Muddy Children Generalized ....................................... 141
     8.2.1 Generalized Quantifiers ..................................... 142
  8.3 Quantifiers as Background Assumptions .......................... 146
     8.3.1 Increasing Quantifiers ....................................... 146
     8.3.2 Decreasing Quantifiers ...................................... 147
     8.3.3 Cardinal and Parity Quantifiers .............................. 148
     8.3.4 Proportional Quantifiers .................................... 150
  8.4 Iterated Epistemic Reasoning ...................................... 151
     8.4.1 An Epistemic Model Based on the Number Triangle ...... 154
  8.5 Muddy Children Solvability ........................................ 156
  8.6 Discussion .................................................................. 158
  8.7 Conclusions and Perspectives ..................................... 161

IV Conclusions ................................................................. 163

9 Conclusions and Outlook ................................................. 165

Bibliography ................................................................. 169

Index .............................................................................. 179

Abstract ........................................................................... 181

Samenvatting ..................................................................... 183
