I would like to thank my promotor Chris Jesshope who gave me the opportunity to be involved in a challenging research project among the CSA group at the University of Amsterdam (UVA). It started at first in 2005 for a master internship in the brand-new CSA group; Chris then offered to me a position as PhD candidate in his group. This opened me a great chapter to explore research topics and to develop and refine my scientific insight. Moreover, I would like to remember my former Peter Knijnenburg who, despite his disease, tried to give as much guidance as he could in the early stage. Clemens Grelck came in the group in the last stage of my PhD; I would like to thank him for his thorough input on my research and thesis.

During my time at EISTI (engineering school), my M.Sc. professors - Chrys Baskiotis and Jorge Mayorquim - challenged me in following further the exploration and understanding research topics in computer science. I would like to thank them for their guidance and directions in finding interesting and challenging domains of work. My classmates Philippe Olivier, Gerard Manguelle, Jean-Baptiste Le Stang, David Monclus, Georg Ramne, Benjamin Rigaud, Alexis Kofman, Cyril Ledru, Samya El Yousfi and I experienced teamwork and engineering on the smart-car project and other assignments.

During these years at the UvA, Kostas Bousais and ‘Jony’ Li Zhang were great officemates who gave me assistance and support during the difficult times but also for an after-work beer&dinner. Michael Hicks has been a great help in proofreading this thesis and in collaborating in the compiler development along with Simon Polstra. I thank you both and also my other colleagues: Mike Lankamp, Mark Thompson, Roberta Piscitelli, Toktam Tagahvi, Yang Qiang, Fu Jian, Irfan Uddin, Roy Bakker, Aram Visser, Peter van Stralen and Andy Pimentel. I would like to also mention my former colleagues Guang Liang, Joe Masters, Bram de Geus. Michiel van Tol, you always gave good fun at the office and out for a drink with the other guys. Raphael Poss, you have provided such a good insight on my work and group research. You have made me reflect a lot on research choices and undertaken directions. Your input has been really
helpful.

I had the chance to have had great support and fun with our secretaries Erik Hitipeuw, Alexis Salin and Dorien Bisselink. They helped a lot in going through UvA bureaucracy. Thanks to you all! Big thanks to Erik!

During EU project meetings, I met Marcel Beemster and Joe van Vlijmen, both working in industry. They have offered me good perspectives on my work and myself from their industrial insight and experience. It gave a little push which was necessary to make further effort during my research.

During my internship at NXP in Eindhoven, I encountered two major players in the field Marc Duranton and Zbigniev Chamski. Marc, you have pinpointed all research challenges and proposed directions in realizing a feasible research and scientific output. Zbigniev, your expertise in compiler and in GCC really gave me good support in choices I made during my research. I also encountered colleagues who became friends: Anthony Martiniere, Rodrigo Baptista, Joao Paulo Carreiro, Camille Cortet, Alice Schwab, Amelie Onzon and Fancois Jegaden. This NXP experience could not have been better without you.

My time as a PhD candidate has been great with friends around me who became my family in Amsterdam. Two persons come first in mind who could be my two big brothers Yves Fomekong Nanfack and Alfredo Tirado-Ramos. Heidi Denzel van Ramos, it was great to have met you. Sometimes hard to follow your flow of intellectual thoughts, we had good fun and great discussions. Along Yves and Alfredo, Jordi Vidal and Carlos Tamulonis were part of our UvA gang. Thanks guys for the good times! Tim van Kasteren, you are also part of my family - my bro man! Whoppa! We had such great discussions about everything and nothing. Anton Bossenbroek, you opened to me the Dutch society and your family. I am really grateful for what you did and to your parents Anne and Vim. Tom de Jong, you and your gang of friends gave me a lot of fun and retrospective on the Dutch lifestyle and friendship. I am also pleased to have encountered Maaike Weber, we had fun discussions. Thank you all for the good memories!

I would like to give many thanks to my informal supervisor Marten Postma. Marten who is not an expert in my research area, you have given me so many good and thorough advices on how to conduct my research and my thesis. Thanks! For all the casual discussions at the UvA, I would like to thank: Nol Chandapol, Eric Lorenz, Fabio Tiriticco, Narges Javaheri, Breandnan O Nual-lain, Michael Sipior, Max Filatov, Isabelle Wartelle, Gohar Sargsyan and all the members of the CSP lab. Thanks to Adam Belloum for all our hallway discussions and your support.

Dealing with the Dutch language is quite a challenge for a French guy. Charlotta Olthof, you decided to invest in teaching me the language and the subtle things about the Dutch society. You always found the way to push me further for my Dutch and my own challenges. Thanks!

My time in Amsterdam would not have been the same without football. I had
the chance to play with world-class players: Alex Ter Beek, Jurjen Meeuwissen, Victor Guevara, Arnaud Spangenberg, Pierre-Alain Breuil, Tibert van der Loop, Michel Ferreira, Alessia Amore, Andreas Angermayr, Akshay Katre, Michel Ferreira, Alessia Gasparini, Mauro, Niels Turing, Gordon Lim, Cyrielle Allais, Wojciech Dzik, Pawel Dydio, Vladi Bocokic, Greg Seltzer, Chris Swan and all the others I played with or against. We had very bad and good games as well! When is the return game?? We drunk lot’s of liters of beer after our amazing games.

My friends from my university time gave me comfort and support at all times as well: Daniel Doan, Stephane N’Guyen, Benoit Caron, Christophe Lepley, Filipe De Azevedo, Julien Cossais, Johann Bargoin. Germain Maurice, Jean-Marie Merizio, we had so much fun each time we met. Despite the distance, Nicolas Lefort, you still made it feel closer with your special jokes. ;-)

My family in Paris and in Toulouse has been always there for me in sharing the difficult times and also in during the great times. I feel really thankful to have them around despite the distance. Lisa, you have been around me in moments of doubt and joy. You always found a way to support me to go through it and till the end. Your words always had great vibes and gave me strength to achieve my goals and dreams. Thank you miss!
