1 Introduction  1
  1.1 Research Questions  3
  1.2 Organization  5
  1.3 Main Contributions  6
  1.4 Origins of the Thesis  7

I. Searchers in Audiovisual Broadcast Archives  8

2 Audiovisual Searchers  11
  2.1 User Studies in Information Retrieval  11
  2.2 Field Studies of Audiovisual Retrieval  13
    2.2.1 Web Searchers  13
    2.2.2 Archive Users  14
  2.3 Laboratory Experiments  15
    2.3.1 Experiments Involving Students and Researchers  16
    2.3.2 Professionals in the Lab  17
    2.3.3 Simulated Searchers  18
  2.4 Discussion  19

3 Search Behavior of Media Professionals  21
  3.1 Organizational Setting  22
    3.1.1 Users of the Archive  23
    3.1.2 Finding and Ordering Audiovisual Material  23
    3.1.3 Audiovisual Thesaurus  26

# Contents

6.4 Conclusions ................................................. 79

7 Two Collections .............................................. 81
  7.1 The Broadcast News Collection ......................... 81
    7.1.1 Collection Overview ................................. 82
    7.1.2 A Unified Multimedia Thesaurus .................... 83
  7.2 The Archive Footage Collection ......................... 85
    7.2.1 Collection Overview ................................. 85
    7.2.2 Archive Query Set .................................. 86
    7.2.3 Future Query Set .................................... 88
    7.2.4 Lab Query Set ....................................... 90
  7.3 Conclusion ................................................. 92

8 Assessing Concept Selection for Video Retrieval .......... 93
  8.1 Concept Selection Benchmark Development ............... 95
    8.1.1 Collection Benchmark ................................ 96
    8.1.2 Human Benchmark .................................... 98
  8.2 Analysis of the Concept Selection Benchmarks .......... 100
    8.2.1 Semantic Overlap Between the Benchmarks .......... 100
    8.2.2 Retrieval Performance ............................... 104
    8.2.3 Reproducibility ..................................... 108
  8.3 Using the Benchmarks to Assess Concept Selection ....... 110
    8.3.1 Assessment Measures ................................. 110
    8.3.2 Test Case: Assessing Concept Selection ........... 111
  8.4 Discussion ................................................ 115
    8.4.1 Analyzing the Benchmarks ........................... 115
    8.4.2 Evaluating Concept Selection Algorithms .......... 116
  8.5 Conclusions ............................................... 116

9 Redundancy and the Temporal Mismatch ..................... 119
  9.1 Discovering Redundancy ................................ 122
    9.1.1 Methodology ......................................... 122
    9.1.2 Experimental Setup .................................. 123
    9.1.3 Redundancy in the Video Signal ...................... 124
    9.1.4 Redundancy Across the Video and Audio Signals .... 126
    9.1.5 Estimating Expected Visual Relevance ............... 127
  9.2 Retrieval Framework ...................................... 128
    9.2.1 Retrieval Based on Language Modeling .............. 128
    9.2.2 Document Expansion .................................. 129
    9.2.3 Integrating Redundancy ............................... 130
9.3 Retrieval Experiments .................................................. 131
  9.3.1 Result Overview ...................................................... 131
  9.3.2 Impact at the Item Level ........................................... 133
  9.3.3 Comparing the redundancy models ............................. 135
9.4 Conclusions and Future Work ......................................... 137

10 Integrating Content-Based Video Retrieval into the Archive 139
  10.1 Evaluation Methodology ............................................. 141
    10.1.1 Query Definitions .............................................. 141
    10.1.2 Retrieval Data Sources ........................................ 143
    10.1.3 Video Retrieval Tasks .......................................... 143
    10.1.4 Video Search Engines .......................................... 143
  10.2 Experimental Setup .................................................. 145
  10.3 Results ................................................................. 146
    10.3.1 Experiment 1: 3x3 Shot Retrieval ............................ 146
    10.3.2 Experiment 2: 3x3 Program Retrieval ....................... 148
    10.3.3 Experiment 3: Program Retrieval with Simulated Queries . 148
    10.3.4 Experiment 4: Prioritizing Content Search .................. 149
  10.4 Conclusions and Recommendations ................................ 149

11 Conclusion to Part II ..................................................... 153

12 Conclusions to the Thesis ............................................ 155
  12.1 Answers to Research Questions .................................. 155
  12.2 Main Contributions .................................................. 157
  12.3 Future Directions .................................................... 159

Bibliography ................................................................. 161

A Identifying Title and Thesaurus Terms in Queries .................. 175

B Visual Concepts in the Multimedia Thesaurus ..................... 179

C Queries ........................................................................ 183

Samenvatting .................................................................. 187

Summary ......................................................................... 189
