You will be contacted as soon as possible.

Contents

1	Introduction	1
1.1	Optimization Problems and Systems of Geometric Objects . . .	1
1.2	Application Areas	2
1.2.1	Wireless Networks	2
1.2.2	Wireless Network Planning	3
1.2.3	Computational Biology	4
1.2.4	Map Labeling	4
1.2.5	Further Applications	4
1.3	Thesis Overview	4
1.3.1	Published Papers	7
I	Foundations	9
2	Primer on Optimization and Approximation	11
2.1	Classic Notions	11
2.2	Asymptotic Approximation Schemes	14
3	Guide to Geometric Intersection Graphs	17
3.1	Intersection Graphs	17
3.1.1	Interval Graphs and Generalizations	18
3.1.2	Intersection Graphs of Higher Dimensional Objects . . .	20
3.2	Disk Graphs and Ball Graphs	21
3.2.1	Models for Wireless Networks	23
3.3	Relation to Other Graph Classes	25
3.3.1	Relation to Planar Graphs	26
4	Geometric Intersection Graphs and Their Representation	29
4.1	Scalable and ϵ -Separated Objects	29
4.2	Finite Representation	33
4.3	Polynomial Representation and Separation	34
4.3.1	From Representation to Separation	35
4.3.2	From Separation to Representation	37
II	Approximation on Geometric Intersection Graphs	41
	Overview	43
	Problems	43
	Previous Work	44

5	Algorithms on Unit Disk Graph Decompositions	49
5.1	Graph Decompositions	49
5.2	Thickness	53
5.3	Algorithms on Strong, Relaxed Tree Decompositions	54
5.3.1	Maximum Independent Set and Minimum Vertex Cover	55
5.3.2	Minimum Dominating Set	56
5.3.3	Minimum Connected Dominating Set	59
5.4	Unit Disk Graphs of Bounded Thickness	62
6	Density and Unit Disk Graphs	67
6.1	The Density of Unit Disk Graphs	67
6.2	Relation to Thickness	68
6.3	Approximation Schemes	70
6.3.1	Maximum Independent Set	71
6.3.2	Minimum Vertex Cover	74
6.3.3	Minimum Dominating Set	77
6.3.4	Minimum Connected Dominating Set	79
6.3.5	Generalizations	82
6.4	Optimality	84
6.5	Connected Dominating Set on Graphs Excluding a Minor . . .	88
7	Better Approximation Schemes on Disk Graphs	91
7.1	The Ply of Disk Graphs	91
7.2	Approximating Minimum Vertex Cover	92
7.2.1	A Close to Optimal Vertex Cover	93
7.2.2	Properties of the size- and sol-Functions	93
7.2.3	Computing the size- and sol-Functions	95
7.2.4	An eptas for Minimum Vertex Cover	98
7.3	Approximating Maximum Independent Set	99
7.4	Further Improvements	104
7.5	Maximum Nr. of Disjoint Unit Disks Intersecting a Unit Square	106
8	Domination on Geometric Intersection Graphs	113
8.1	Small ϵ -Nets	114
8.2	Generic Domination	116
8.3	Dominating Set on Geometric Intersection Graphs	119
8.3.1	Homothetic Convex Polygons	119
8.3.2	Regular Polygons	123
8.3.3	More General Objects	125
8.4	Disk Graphs of Bounded Ply	126
8.4.1	Ply-Dependent Approximation Ratio	127
8.4.2	A Constant Approximation Ratio	129
8.4.3	A Better Constant	138
8.5	Hardness of Approximation	145
8.5.1	Intersection Graphs of Polygons	146

8.5.2	Intersection Graphs of Fat Objects	148
8.5.3	Intersection Graphs of Rectangles	150
III	Approximating Geometric Coverage Problems	157
	Overview	159
	Problems	159
	Previous Work	161
9	Geometric Set Cover and Unit Squares	165
9.1	A ptas on Unit Squares	165
9.1.1	Geometric Budgeted Maximum Coverage	175
9.1.2	Optimality and Relation to Domination	177
9.2	Hardness of Approximation	178
10	Geometric Unique and Membership Coverage Problems	181
10.1	Unique Coverage	181
10.1.1	Approximation Algorithm on Unit Disks	182
10.1.2	Budgets and Satisfactions	185
10.1.3	Approximation Algorithm on Unit Squares	187
10.2	Unique Coverage on Disks of Bounded Ply	188
10.2.1	Properties of the cost- and sol-Functions	189
10.2.2	Computing the cost- and sol-Functions	192
10.2.3	The Approximation Algorithm	194
10.3	Geometric Membership Set Cover	196
10.4	Hardness of Approximation	199
11	Conclusion	207
	Bibliography	209
	Author Index	237
	Index	243
	Samenvatting	249
	Summary	251
	Acknowledgments	253
