The completion of a PhD Thesis is a lot more than just a compilation of experiments, it is a journey for personal and professional growth. There are many little contributions and as such I must thank all contributors. Four years is a very long time, actually four and a half, and when people spend so much time together working it is very difficult not to create personal bonds between them. This makes the experience so much more personal and definitely something that will become part of our baggage. For me this has been a very special time during which I have certainly learned many things about myself and the world that surrounds me. For all those who supported me, those who believed in me those who encouraged me, those who listened to me, those who understood me and those who kicked me: it is time to say thank you:

To my promotor Prof. Luisa De Cola and to my co-promotor Dr. René M. Williams for giving me the opportunity to do my PhD at the University of Amsterdam on such a fascinating topic and for supporting me scientifically with your creativity and ideas. Dear Rene, thank you for all your help, especially during the thesis writing and finalizing period of the manuscript.

For the technical support during my PhD all around the laser equipments in Amsterdam and in Muenster, in the laboratory, for security related issues, for NMR support, recording of HRTEM images or any other help I needed I want to thank John van Ramesdonk, Dick Bebelaar, Michiel Groeneveld, Bernhard Chlebowsky, Klaus Schuermann, Dorette Tromp, Marjo Mittelmeijer-Hazeleger, Jan-Meine Ernsting, Jan Geenevasen, Benedikt Gralla, Frans Tichelaar and Joep. Especially I want to thank Dick Bebelaar for his help with the SPC setup and all the time spend teaching me about optics-electronics and lasers.

A very special thank you goes to the personnel of the UvA library afd. Scheikunde. It was always a pleasure to drop by and find a smiling and helpful person. Marijke Duyvendak (Palomar?).

For administrative matters, help with problems with on-line tools (what can I say?) or just a friendly E-mail every once in a while I want to thank Hanneke Pentinga,
Maureen Sabandar, Petra Hagen, Renate Hippert, Ineke, Nicole Altmann (die Amarillys ist Idioten sicher!), Insa Wassmus (hoffe es geht besser!), Maria Jaklin (Centech duftet wunderbar!) and very especially Jo Lansbergen.

When I arrived to Amsterdam I was immediately embedded in the De Cola group and the HIMS. Many people come and go in such an environment and I hope I don’t forget anybody. Thanks to Anthony (I made it), Fred (todos los gabachos son unos cabr…), Enrico, Zoran, Gregg (and Diane Kottas!), Huub, Tora (are you ready for peaches?), Paolo, Elio, Steve, Ron, Franti and Taasje. People in the group of Kees Elsevier were part of my everyday as well and I want to thank Gadi, Alex, Erika, Michael and of course David (todavía me río del día de “¡diga? ¡diga, qué?……”).

I want to thank Laura, Mehul (and Canchan), Anil, Ana, Enrico, Emma, Nina (Lenor mit Febreeze Effekt!) Francesco, and of course our two Portuguese acquisitions Susana and Alex, Lara (professionista!), Daniela, Olka, Stella (how long are you going to stay down under?) Monique (te tengo que contrar) and Jarek, for all the great moments and the greater ones to come.

After a short period Luisa decided to move to Münster but careful consideration made me decide to stay at the UvA. I was adopted at the same time by two groups: the Organic Molecular Photonics in Amsterdam and the new Molecular Photonics Group in Germany. The transition was truly a nightmare… but in any case I want to thank in Amsterdam Wybren Jan, Fred, Hong and more recently Sander for welcoming me into their group: Dhiredj, Peter, Jacob, Koos, Mirka, Irina, Catha, Alessandro, Emile (roommate 1: ACS!), Deniz (roommate 2: your cat pissed on my bed again), Marcel, Arnaud, Samir, Qian, Van Ahn, Chantal (what!?), Joanna (your cat also pissed on my bed), Tanzeela, Michiel, Stephen, Bert, Anouk (skiing is super dangerous…), Matthijs, Mattijs (and Claire: I am not drinking that home-made stuff), Adriana (never time for coffee), Sergio, Zyvmon, Pavol and Dani.

In Münster (I have to thank some people again): Gregg (and Diane) and Elio of course for running things, Christian, Enrico, Gabriele, Srinidhi, Klaus, Manuel, Yin-hui, Zoran, Marita, Andres, Rodrigo, Matthias (Otter), Mathias (Mydlak, you know I prefer
you), Sandra (Zeolite = kitty litter), Fabio, Christian, Michael & Asgeir (bad combination), Gigi, Benoit, Aurelie and Claudia (je veux écrire quelque chose pour vous faire sourire!). A very special thank you goes to David and Yolanda for all the good times spend inside and outside the lab sharing Ferrero Rocher, fixing the world and wrapping cars around streetlights!

I want to thank the entire Marie-Curie RTN Uni-Nanocups Network and for their hospitality during scientific meetings and organized activities. For the time spend in his group in Dublin I want to thank Prof. Robert Forster. Also in Dublin Deirdre and Uzun are thanked for their help and especially Almut for a collaboration that turned into a chapter in this thesis. For all the visits and exchanges I want to thank Dr. Martin C. Feiters and the entire group of Prof. Roeland J. M. Nolte in Nijmegen. Dear Martin, it has been a pleasure working with you, thanks for everything and thank you for your detailed correction of the manuscript. Marco and Nikos I am glad we had all these projects together and I wish you both the greatest success in everything you do from now on.

For extra corrections and suggestions I want to thank Lara (chapter 1), Marco (chapters 2 & 4), Anouk (chapter 3 and samenvatting and thanks for dinner), Nina (chapter 5), Van Ahn (chapter 6) and Nikos (chapter 7, you rewrote it!).

To my friends in Amsterdam: Laura (lady croquet), Laura (magic pin), Marta, Maria, Ruth, Emma, Natasha, Alessandra; to my friends in Spain: Loreto, Ana (Moncloa), Ana (Parla), Irene (BCN), Irene (and David), Henar (and Virginia, Emi, Lola, Esther), Elena (y Jorge), Elisa, Gema, Sita; to my friends in Berlin: Paola, Beate, Maria and Isabella; thanks for visiting and cheering me up and thanks for shelter when I needed to crash.

Vielen dank an Monika Minderop (Hendrik, Adrian u. Familie) für deine Unterstützung. Für die Weihnachtsgans, deine vielen Anrufe mit aufmunternden geläster und all die schönen Zeiten die wir als Familie zusammen verbracht haben.
Gracias a mi Tante Rosa, que también está aquí hoy en el día de mi defensa.

Un gracias a mi familia y sobre todo a mis padres. Gracias por todos los esfuerzos y sacrificios. Gracias por el apoyo que he recibido de vosotros en todos los pasos que he dado hasta aquí y gracias por el que recibirá en todos los pasos que a partir de ahora daré hacia el futuro en mi vida.

Amsterdam
