5.5.2 Economical perspective ................................................................. 116
5.5.3 Technological perspective ............................................................. 118
5.5.4 Managerial perspective ................................................................. 120
5.6 Chapter discussion and conclusion ................................................... 122

6. Development of trust management system for VBEs ...................... 123

6.1 Introduction ........................................................................................ 123
6.2 VBE management system .................................................................. 124
  6.2.1 VMS base concepts and motivation ............................................. 124
  6.2.2 VMS subsystems .......................................................................... 125
6.3 Trust management system ................................................................. 128
  6.3.1 Mechanisms for assessing trust level of organizations ................. 128
  6.3.2 Approach for developing the TrustMan system ............................ 129
6.4 Analysis and specification of the TrustMan system ............................ 131
  6.4.1 Specification of system users and user requirements .................... 131
  6.4.2 Specification of functionalities and services .................................. 133
6.5 Designing the TrustMan system ......................................................... 135
  6.5.1 Interoperability architecture of the TrustMan system ................. 135
  6.5.2 The four-layer componential architecture of the TrustMan system .. 137
  6.5.3 Design of user interfaces of the TrustMan system ...................... 140
  6.5.4 Design of database schema for the TrustMan system ................. 141
6.6 Implementation and operation of the TrustMan system ..................... 142
  6.6.1 Implementation of the TrustMan system ..................................... 144
  6.6.2 Take-ups of the TrustMan at running industrial VBE networks .... 149
6.7 Chapter discussion and conclusion ................................................... 157

7. Conclusion, validation, lessons learned and future work .................... 159

7.1 Introduction ........................................................................................ 159
7.2 Reflection on research findings .......................................................... 159
  7.2.1 Reflection on responses to the research questions ....................... 159
  7.2.2 Reflection on achievement of research objectives ....................... 160
7.3 Evaluation and validation of research results ...................................... 161
  7.3.1 General evaluation approaches .................................................... 161
  7.3.2 Validation of our achieved results .............................................. 162
  7.3.3 Empirical validation – Achievements in relation to VBE requirements .. 163
  7.3.4 Self validation – With standard indicators and against other systems .... 165
  7.3.5 Peer reviewed validation – Within scientific community ............. 167
7.4 Lessons learned and future work ....................................................... 168
  7.4.1 Inter-organizational trust: lessons learned ................................... 168
  7.4.2 Inter-organizational trust: future work ....................................... 170
A. List of author’s publications ................................. 173

B. TrustMan validation with standard indicators and against related systems ........................................... 177
   B.1 Applied standard indicators ................................................................. 177
   B.2 Related trust management systems ...................................................... 181
   B.3 Evaluation of TrustMan system with standard indicators .................. 182

C. Empirical evaluation – questionnaire ................................. 183
   C.1 VBE networks involved in evaluation .................................................. 183
   C.2 Description of the questionnaire ........................................................ 184

Bibliography ............................................................................. 185

Summary .................................................................................. 191

Samenvatting ........................................................................... 193

Acknowledgements .................................................................. 195
