

Data Sharing Statement

Arntz. Effectiveness of Predominantly Group Schema Therapy and Combined Individual and Group Schema Therapy for Borderline Personality Disorder. *JAMA Psychiatry*. Published March 02, 2022. doi:10.1001/jamapsychiatry.2022.0010

Data

Data available: Yes

Data types: Deidentified participant data

How to access data: Pseudonymised individual participant data that underlie the results reported in this article will be made available for researchers upon reasonable request, which must include a protocol and statistical analysis plan and not be in conflict with our prespecified publication plan. The request should include a guarantee of compliance with the EU and participating countries' General Data Protection Regulations given the privacy sensitive character of the data. Data and a data dictionary will be made available after publication, for at least 5 years. Requests for data sharing will be considered by the study board. Requests should be directed to a.r.arntz@uva.nl; requestors will need to sign a data access agreement.

When available: With publication

Supporting Documents

Document types: Statistical/analytic code, Informed consent form

How to access documents: a.r.arntz@uva.nl

When available: With publication

Additional Information

Who can access the data: Pseudonymised individual participant data that underlie the results reported in this article will be made available for researchers upon reasonable request, which must include a protocol and statistical analysis plan and not be in conflict with our prespecified publication plan. The request should include a guarantee of compliance with the EU and participating countries' General Data Protection Regulations given the privacy sensitive character of the data. Data and a data dictionary will be made available after publication, for at least 5 years. Requests for data sharing will be considered by the study board. Requests should be directed to a.r.arntz@uva.nl; requestors will need to sign a data access agreement.

Types of analyses: Pseudonymised individual participant data that underlie the results reported in this article will be made available for researchers upon reasonable request, which must include a protocol and statistical analysis plan and not be in conflict with our prespecified publication plan. The request should include a guarantee of compliance with the EU and participating countries' General Data Protection Regulations given the privacy sensitive character of the data. Data and a data dictionary will be made available after publication, for at least 5 years. Requests for data sharing will be considered by the study board. Requests should be directed to a.r.arntz@uva.nl; requestors will need to sign a data access agreement.

Mechanisms of data availability: Pseudonymised individual participant data that underlie the results reported in this article will be made available for researchers upon reasonable request, which must include a protocol and statistical analysis plan and not be in conflict with our prespecified publication plan. The request should include a guarantee of compliance with the EU and participating countries' General Data Protection Regulations given the privacy sensitive character of the data. Data and a data dictionary will be made available after publication, for at least 5 years. Requests for data sharing will be considered by the study board. Requests should be directed to a.r.arntz@uva.nl; requestors will need to sign a data access agreement.

Any additional restrictions: Pseudonymised individual participant data that underlie the results reported in this article will be made available for researchers upon reasonable request, which must include a protocol and statistical analysis plan and not be in conflict with our prespecified publication plan. The request should include a guarantee of compliance with the

EU and participating countries' General Data Protection Regulations given the privacy sensitive character of the data. Data and a data dictionary will be made available after publication, for at least 5 years. Requests for data sharing will be considered by the study board. Requests should be directed to a.r.artz@uva.nl; requestors will need to sign a data access agreement.
