Premature aging of the stromal microenvironment in rheumatoid arthritis

Towards prevention of disease by targeting cellular aging

Trijntje Anna de Jong

This research was performed at the Department of Experimental Immunology (EXIM) and the Department of Rheumatology and Clinical Immunology (ARKIM), Amsterdam University Medical Centers, location Academic Medical Center (AMC), Amsterdam, The Netherlands. The research is financially supported by VIDI grant n°91718371 from the Dutch organization for Health Research and Development (ZonMw). Financial support for printing of this thesis was kindly provided by the Amsterdam UMC and the Amsterdam Gastroenterology, Endocrinology and Metabolism (AGEM) research institute.

Title: Premature aging of the stromal microenvironment in rheumatoid arthritis

Cover design and layout: Jelien de Jong

Printed by: Gildeprint

ACADEMISCH PROEFSCHRIFT

ter verkrijging van de graad van doctor
aan de Universiteit van Amsterdam
op gezag van de Rector Magnificus
prof. dr. ir. P.P.C.C. Verbeek
ten overstaan van een door het College voor Promoties ingestelde commissie,
in het openbaar te verdedigen in de Agnietenkapel
op vrijdag 17 maart 2023, te 13.00 uur

door

Trijntje Anna de Jong
Geboren te Harlingen

| PROMOTIECOMMISSIE

Promotor:	dr. E.G.M. van Baarsen	AMC-UvA
Copromotor:	prof. dr. R.H.L. Houtkooper	AMC-UvA
Overige leden:	prof. dr. R.E. Mebius	Vrije Universiteit Amsterdam
	dr. P.M. Krawczyk	AMC-UvA
	prof. dr. R.T. Jaspers	Vrije Universiteit Amsterdam
	prof. dr. N. de Vries	AMC-UvA
	prof. dr. N. Zelcer	AMC-UvA
	prof. dr. S.E. la Fleur	AMC-UvA

Faculteit der Geneeskunde

| Table of contents

Chapter 1	Introduction and thesis outline	11
Chapter 2	Bridging insights of lymph node and synovium studies in early rheumatoid arthritis	27
Chapter 3	Synovial gene signatures associated with the development of rheumatoid arthritis in at risk individuals: a prospective study	41
Chapter 4	Altered lipid metabolism in synovial fibroblasts of individuals at risk of developing rheumatoid arthritis	59
Chapter 5	Lower metabolic potential and impaired metabolic flexibility in human lymph node stromal cells of patients with rheumatoid arthritis	77
Chapter 6	Premature aging in lymph node stromal cells of patients with rheumatoid arthritis partly restored by dasatinib treatment	93
Chapter 7	Transient expression of nuclear reprogramming factors in lymph node stromal cells partly ameliorates the premature aging phenotype associated with preclinical rheumatoid arthritis	117
Chapter 8	General discussion	133
Appendices	Summary	154
	Nederlandse samenvatting	157
	List of publications	161
	PhD portfolio	162
	Curriculum vitae	164
	Dankwoord	165
