Visualization of heuristic-based multi-objective design space exploration of embedded systems
Taghavi Razavi Zadeh, T.

Citation for published version (APA):
Table of contents

Abstract .......................................................... 1
Acknowledgments .................................................. iii
Table of contents ................................................... v
List of Tables ....................................................... ix
List of Figures ..................................................... xi

Chapter 1: Introduction ............................................ 11
  1.1 DSE in Embedded Systems Design ......................... 11
  1.2 The Need for Visualization ............................... 12
  1.3 Problem Description ....................................... 12
  1.4 Multi-Objective DSE Stages .............................. 13
    1.4.1 Developing the Best Optimization Algorithm ....... 13
    1.4.2 Exploring the Design Space ........................ 13
    1.4.3 Multi-Objective Decision Making .................. 13
  1.5 Thesis Organization and Contributions .................. 13

Chapter 2: Background Information ......................... 11
  2.1 Multi-Objective Optimization .......................... 11
  2.2 Multi-Objective DSE ..................................... 16
    2.2.1 Sesame Environment ................................ 18
    2.2.2 Multi-Objective Evolutionary Algorithms .......... 21
  2.3 Visualization ............................................. 22
    2.3.1 Visualization Classification ....................... 22
    2.3.2 Information Visualization .......................... 23
    2.3.3 Multivariate Data Visualization ................... 30
    2.3.4 Visualization Evaluation ........................... 35
  2.4 Conclusion ................................................. 31

Chapter 3: Visualization of Multi-Objective DSE .......... 39
  3.1 Related Work ............................................. 39
