List of Tables

Table 2.1: Differences between the Two Study Sites by September 2006 .......... 23
Table 2.2: Socio-Demographic Characteristics of the Respondents: Survey Data (n=262) .............................................................................................................. 26
Table 2.3: Qualitative Sampling Elements ........................................................................................................... 27
Table 2.4: Number of Participants in Each FGD ............................................................................................... 28
Table 3.1: Non-adherence to Particular Adherence Activities over the 3-Year Period ........................................................................................................... 40
Table 3.2: Proportion of People who Returned on the Exact Date of Appointment ....................................................................................................... 41
Table 3.3: Incidences of Missing Pharmacy Refill and Possibility of Running out of Doses .................................................................................................. 42
Table 3.4: Reasons for Missing Pharmacy Refill Appointment ............................................................................. 43
Table 3.5: Reasons for Taking ARVs on an Empty Stomach .................................................................................. 44
Table 3.5b: Number of Hours defaulted (both sites combined) ........................................................................... 45
Table 3.6: Reasons for Missing Dosing Time ........................................................................................................ 46
Table 3.7: Reasons for Failure to Return Extra Unused Pills .................................................................................... 47
Table 3.8: Proportion of Patients who Ever Missed Pills over the Three Years ...................................................... 47
Table 3.9: Adherence Status for the Mission and Public Facility (n=262) .............................................................. 48
Table 3.10: Reasons for Missing Antiretroviral Medication (n=144) ....................................................................... 49
Table 3.11: Mean Proportion and Episodes of Missed Pills for Each Month .................................................................. 50
Table 3.12: Appearances of Adherence Barrier under a given Adherence Activity ...................................................................................................... 53
Table 3.13: Effects of Adherence Barriers on Adherence Activities ........................................................................... 55
Table 4.1: Structure of the Direct Costs in the Mission and Public Facility ............................................................ 66
Table 4.2: Effect of Affordability on Adherence (n=65) ............................................................................................. 68
Table 4.3: Proportion of Respondents who Benefited from Assistance at Any Time ....................................................................................................... 72
Table 4.4: Sources of Funds for Financings Non-medical Costs .............................................................................. 74
Table 5.1: Repeat of Table 3.6 (n=262) ................................................................................................................. 80
Table 5.2: Proportion of Patients Achieving >95% Adherence on a Quarterly Basis ................................................. 81
Table 5.3: Proportion of Patients Achieving ≥ 95% Adherence on a Monthly Basis .................................................... 81
Table 5.4: Mean Score CD4+ cell count at each Clinical Test .................................................................................... 83
Table 5.5: Mean Change in CD4+ Cell Count between Two Consecutive Visits.......................................................................................................................... 83
Table 5.6: Changes in Functional Status (Both Facilities Combined) .................. 85
Table 5.7: Severity of Drug Side-effects (both Sites combined) (n=225)............. 87
Table 5.8: Reasons for Being 100% Adherent to the Initiation Appointments (both Sites Combined) ........................................................................................................ 89
Table 5.9: Number of Orphans per Household and Survival Status of Biological Parents (Both Sites) ............................................................. 91
Table 6.1: Information Appearances between the Two Sites .............................. 108
Table 6.2: Relationship between Counselling Information and Adherence Barriers......................................................................................................................... 121
Table 7.1: Patient’s Satisfaction with Treatment Support (Both Sites Combined) ............................................................................................................................. 139
Table 7.2: Overview of Staffing and Healthcare Burden ................................. 146
Table 7.3: Proportion of Respondents who benefited from Assistance at Any Time......................................................................................................................... 150
Table A.1: Typology for Assessing Sustained Adherence to HIV Treatment........ 189
Table A.2: Data for Seasonal Rainfall for Central Uganda (Amount of Rainfall in millimetres) ................................................................................................. 189
Table A.3a: Road Access Rating ........................................................................ 190
Table A.3b: Means of Transport Used ................................................................ 190
Table A.4: Reasons for being Highly Committed to ART (Both Sites Combined) (n=262) ........................................................................................................ 190
Table A.5: Treatment Support Provider-Recipient Relationship ......................... 191
Table A.6: Number of Staff by Department in Kayunga Hospital (Public Facility) ......................................................................................................................... 191
Table A.7: Comprehensive Healthcare Services in the Mission Facility ............. 192
Table A.8: Household Asset Ownership and Technical Notes .............................. 192
List of Figures

Figure 3.1: Reasons for Occurrence of Missed Pills in Calendar Months.............. 51
Figure 3.2: Seasonal Rainfall (mm) for Central Uganda........................................... 51
Figure 4.1: Percentage of Households Participating in a Given Income Source ...... 63
Figure 4.2: Proportion of Household Spending on an Item..................................... 64
Figure 5.1: Mean Change in Weight (Median)......................................................... 84
Figure A.1: Changes in WHO Clinical Stages by Quarter. (Both Sites Combined) .......................................................................................................194
Figure A.2: HIV Diagnosis by Age Group in Public Facility .....................................195
Figure A.3: Eligibility for ART by Gender and Age in Kayunga Public Hospital.... 195

List of Figures

Text Box 2.1: Adherence Activities................................................................. 20
Text Box 2.2: Key Questions Included in the Questionnaire......................... 31
