Deciduous Molar Hypomineralisation, its nature and nurture

Deciduous Molar Hypomineralisation, its nature and nurture

Molars of cheese?

The picture on the cover of this thesis is Dutch cheese in the shape of a molar. Why Dutch cheese, you might think. The hypomineralised areas in teeth with Deciduous Molar Hypomineralisation (DMH) are often yellowish, resembling the colour of old Dutch cheese. Therefore the condition is also called cheese-molar.
