Acknowledgements

First of all I would like to thank my supervisor (co-promotor) Florian Wagener for his trust in me when he invited me to join his project, for his excellent supervision, constant support and encouragement throughout the five years of my PhD. Our weekly meetings when I had to report on the achieved results kept me organized and increased my productivity. I also want to thank Florian for his patience and criticism throughout the thesis-writing process. Furthermore, I would like to thank my promotor and my ‘always looking after me’ boss Cars Hommes for his support and the always positive attitude. I met him when I was a student at the Master Class program at Utrecht University. Under supervision of Cars Hommes and Yuri Kouznetsov I worked on my master thesis, an extended version of which has now been published in *Macroeconomic Dynamics* journal. I also want to thank Cars for extending my working contract due to my parental leave, which provided me with more time to finish writing the thesis.

I would like to express my gratitude also to the members of my thesis committee Herbert Dawid, Jeroen Hinloopen, Ale Jan Homburg, Peter Kort and Cees Withagen, for reading the manuscript. I also thank the Tinbergen Institute, the University of Amsterdam and the Netherlands Organization for Scientific Research (NWO) for their generous financial support.

I am grateful to all my colleagues at CeNDEF for creating a pleasant working environment and making the lunch and coffee breaks fun. Thanks to Cees Diks, Maurice Koster, Marius Ochea, Paolo Zeppini, Te Bao, Daan in ’t Veld. Special thanks go to Jan Tuinstra for his cheerful support, to Pim Heijnen for being my first Dutch friend, to my friend Misha Anufriev who helped me out every time I needed it, to my officemate and friend Domenico Massaro with whom I had a lot of fun. I am extremely grateful to Saeed Moghayer, who was the first person

I met in Utrecht and who later became my best friend and my colleague at CeNDEF. Thanks to Saeed for his constant support throughout my stay in Holland.

I would like to thank my friends and acquaintances from all over the globe for making the five years of my PhD the best years in my life. Special thanks go to Denis Miretskiy, without whom I wouldn't start my PhD in Holland.

And the last but the most important acknowledgement. I am infinitely indebted to the members of my family. I am grateful to my mother Galina, my father Alexander and my sister Natalia for their love, support and patience; and to my parents-in-law Vera and Eugene for babysitting Lennart while I was traveling to conferences. Last but not least, my special gratitude goes to the two men who make my life meaningful - my husband Dmitry Roytenberg, one of the most intelligent and talented people I know, and our little son Lennart. They are always in my heart.

Tatiana Kiseleva,

Amsterdam, July 2011
