If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <https://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.

Contents

- 1 Introduction** **1**
 - 1.1 Technological change 1
 - 1.2 Thesis outline 3
 - 1.3 A behavioural approach to technological change 5
 - 1.4 Positive and negative feedback 7

- 2 Optimal diversity in investments with recombinant innovation** **11**
 - 2.1 Introduction 11
 - 2.2 The model 15
 - 2.2.1 General framework 15
 - 2.2.2 The effect of balance 18
 - 2.2.3 Introducing a size effect 22
 - 2.3 Optimization of diversity 26
 - 2.3.1 A simple case 26
 - 2.3.2 Optimization with a size effect and zero initial values 32
 - 2.3.3 The effect of non-zero initial values on the optimal investment decision 36
 - 2.3.4 Heterogeneous returns to scale 39
 - 2.4 Conclusion 40
 - 2.A Condition for constant balance 43
 - 2.B General model solution 44

3	Competing recombinant technologies for environmental innovation	49
3.1	Introduction	49
3.2	The model	52
3.2.1	Competing clean and dirty technologies	52
3.2.2	Recombinant innovation	54
3.2.3	Network externalities	56
3.2.4	Arthur’s model extended	56
3.2.5	Simulation of the model	59
3.3	Environmental policy	62
3.3.1	Simulation of the model with environmental policy	63
3.3.2	Cost of environmental policy	68
3.4	Conclusion	70
4	A behavioural model of endogenous technological change	73
4.1	Introduction	73
4.2	Costly innovators versus cheap imitators	77
4.2.1	The model	77
4.2.2	Steady states and stability	81
4.2.3	Period doubling and period halving bifurcations	83
4.3	Asynchronous updating of strategies	88
4.4	Technological progress	92
4.4.1	The model	93
4.4.2	Numerical simulations	98
4.4.3	Path-dependence and learning curves	101
4.5	Conclusion	105
4.A	Proofs	107
4.B	Conditions for chaotic dynamics	107

5	Competing technologies: a discrete choice model	109
5.1	Introduction	109
5.2	Social interactions and network externalities	114
5.3	Competing technologies with an environmental policy	121
5.4	Competing technologies and technological progress	126
5.5	Technological progress and environmental policy	133
5.6	Conclusion	140
5.A	Analysis of equilibria in the basic model	143
5.B	Environmental policy with pollution tax	144
5.C	Analysis of equilibria for the extended models	144
6	Conclusions	147
6.1	Summary	147
6.2	Future research	151
	Bibliography	153
	Samenvatting	163
