CHAPTER FIVE:
THE PRAGMATIC APPROACH CHARACTERIZING
THE COUNTER-PIRACY INITIATIVES

6.1. INTRODUCTION

In September 1814, ambassadors from European countries gathered in Vienna, Austria, to negotiate a long-term peace plan for Europe following the Napoleonic Wars. Deliberations were long – it was not before June 1815 that they adopted the Final Act of the Congress of Vienna - and were accompanied by many social events that put Austria to great expense. The Prince of Ligne, one of the participants, described the Congress at the time as follows: "Le congrès danse beaucoup, mais il ne marche pas" ("the Congress dances a lot, but it does not get anywhere").

To a large extent, the engagement of the international community that followed the spike in piracy attacks off the coast of Somalia was an antithesis to the Vienna Congress and to the classic features commonly associated with international gatherings. Rather than engaging in lengthy deliberations, commonplace in the diplomatic world, or creating costly, formal, and cumbersome new mechanisms, what emerged from the various counter-piracy undertakings was a pragmatic approach. Efficiency has become a guiding principle.

The pragmatic, informal, paradigm has been manifested in a number of aspects. Noteworthy of which are the legal framework and the institutional landscape, whose presentation in this chapter illustrates the application of that paradigm.

6.2. THE LEGAL FRAMEWORK

A common, traditional approach of the international community in addressing an emerging threat is the adoption of new legal instruments, typically new treaties or protocols to existing treaties. Considering the shortcomings in UNCLOS, discussed in previous chapters, it is therefore unsurprising that in response to the piracy incidents calls were expressed to create new instruments such as a new treaty to specifically address maritime piracy.\(^{792}\)

Nonetheless, not a single new international treaty was concluded. To the contrary, it was stressed from the very outset that UNCLOS remains the main legal framework, complemented by existing conventions such as the SUA Convention and UNTOC. Nor did countries and organizations launched negotiations over potential amendments to treaties such as to UNCLOS definition of piracy.

Instead, countries engaged in a rapid conclusion of non-binding regional arrangements (the Code of Conducts discussed in Chapter 5) as well as bilateral agreements, for instance on the transfer of piracy suspects from capturing warships to regional States willing to prosecute them or on post-conviction transfers, i.e. with regard to the transfer of sentenced pirates from the prosecuting State to a State willing to detain them. These agreements were concluded in an informal manner (e.g. Memorandum of Understanding,\(^{793}\) Exchange of Letters\(^{794}\)), were not

---

\(^{792}\) Cf. Bento, *supra* note 16, at 441-3 (proposing the adoption of a “United Nations Treaty Against Maritime Piracy” with, inter alia, a new piracy definition, better tools for apprehending and prosecuting pirates, an obligation to establish information centers, and criminalization of ransom payments. The author rejected the idea of adopting a maritime piracy protocol to UNCLOS in light of the inherent limitations on protocols to treaties – see there at 439).

\(^{793}\) For example, the UK signed with a number of countries such as Tanzania and Mauritius a Memorandum of Understanding (MOU) on the transfer of piracy suspects – cf. “UK signs agreement with Mauritius to transfer
registered at the United Nations, and were not always made publicly available, though their existence was mentioned in the media. By concluding such agreements, lengthy procedures associated with new treaties such as ratification by national parliaments were circumvented. In light of efficiency embodied in this course of action, international organizations facilitated and supported the conclusion of such agreements.

The transfer agreements were indeed effective in facilitating the transfer of many suspected pirates to face trial in regional States such as Seychelles and Kenya and the transfer of suspected pirates for prosecution”, Gov.UK, (June 8, 2012), available at https://www.gov.uk/government/news/uk-signs-agreement-with-mauritius-to-transfer-suspected-pirates-for-prosecution.

For example, in March 2009 the European Union signed an Exchange of Letters with Kenya for the transfer of suspected pirates detained by EUNAVFOR - see “Exchange of Letters between the European Union and the Government of Kenya on the conditions and modalities for the transfer of persons suspected of having committed acts of piracy and detained by the European Union-led naval force (EUNAVFOR), and seized property in the possession of EUNAVFOR, from EUNAVFOR to Kenya and for their treatment after such transfer”, available via http://ec.europa.eu/world/agreements/prepareCreateTreatiesWorkspace/treatiesGeneralData.do?step=0&redirect=true&treatyId=7883.

In accordance with article 102(1) of the UN Charter, “Every treaty and every international agreement entered into by any Member of the United Nations after the present Charter comes into force shall as soon as possible be registered with the Secretariat and published by it.”

See Treves, Developments, supra note 147, at 411 (mentioning that “the difficulties met in surrendering captured pirates to a neighbouring state and ensuring that such state will exercise jurisdiction and respect human rights have led to bilateral agreements, mentioned in the media but not made public, between the United Kingdom and the United States and Kenya”).

For example, IMO facilitated the conclusion of the Codes of Conduct. The UNSC invited “all States and regional organizations fighting piracy off the coast of Somalia to conclude special agreements or arrangements with countries willing to take custody of pirates in order to embark law enforcement officials (“shipriders”) from the latter countries, in particular countries in the region, to facilitate the investigation and prosecution of persons detained as a result of operations conducted under this resolution for acts of piracy and armed robbery at sea off the coast of Somalia” – S.C. Res. 1897, supra note 320. The UNSC also requested “States, UNODC and regional organizations to consider, consistent with applicable rules of international human rights law, measures aimed at facilitating the transfer of suspected pirates for trial, and convicted pirates for imprisonment, including through relevant transfer agreements or arrangements” (S.C. Res. 1976, supra note 167).
convicted pirates back to Somalia to serve their sentence. Their successful adoption and implementation should, however, be weighed against certain inherent disadvantages. For example, while the language used in them may appear to create binding obligations,\textsuperscript{798} there was no guarantee that the regional state will accept suspected pirates.\textsuperscript{799} And just as such agreements were swiftly concluded, they could be as quickly terminated or suspended.\textsuperscript{800} As previously mentioned, the transfer agreements raised legal questions, for example on their compliance with Article 105 of UNCLOS.\textsuperscript{801} In some cases, the rapid conclusion of the agreements led to judicial challenges. For example, a 2011 European Council Decision on the signing and conclusion of a transfer agreement between the EU and Mauritius\textsuperscript{802} was challenged before the European Court of Justice by the European Parliament (supported by the European Commission). The Court found that the failure of the European Council to properly and promptly inform the European

\textsuperscript{798} Cf. Article 2(a) of the annex of the EU-Kenya exchange of letters, \textit{supra} note 794: “Kenya \textit{will} accept, upon the request of EUNAVFOR, the transfer of persons detained by EUNAVFOR in connection with piracy and associated seized property by EUNAVFOR and \textit{will} submit such persons and property to its competent authorities for the purpose of investigation and prosecution” (emphasis added).

\textsuperscript{799} See, for example, the following statement from the report of the UK \textit{House of Commons Foreign Affairs Committee}, \textit{supra} note 789, para. 102: “Even when a transfer agreement is in operation, there is no guarantee that the state will accept pirate suspects from naval forces…once EU naval forces detain suspects, they must undertake a negotiation with one or more states to obtain agreement to accept them for prosecution.”

\textsuperscript{800} For example, in 2010 Kenya announced the termination of the transfer agreement with the EU – see Lillian Leposo “Kenya ends agreement with EU to prosecute suspected Somali pirates”, CNN, available at http://edition.cnn.com/2010/WORLD/africa/10/04/kenya.eu.pirates/.

\textsuperscript{801} See discussion \textit{supra} Chapter 2.

Parliament of the agreement was in breach of the applicable EU law. Moreover, not making all agreements publicly available does not conform to the principle of transparency and prevents civil society from questioning or monitoring the agreements’ compliance with established principles such as the prohibition on disguised extradition and, more generally, with human rights standards such as the principle of “non-refoulement.”

In addition to the adoption of regional arrangements and bilateral ad hoc agreements, various actors engaging in the counter-piracy efforts jointly produced supporting instruments and tools. Noteworthy of such instruments is the updated version of the Best Management Practices for Protection against Somalia Based Piracy (BMP), developed by the private industry with the support of IMO and other organizations such as INTERPOL. The purpose of BMP4, namely the updated 4th version of BMP, is "to assist ships to avoid, deter or delay piracy attacks in the High Risk Area." It contains specific guidance on the actions to be taken before, during, and following a piracy attack, and its contribution to the counter-piracy efforts was noted by commentators and the UNSC. Another example for a supporting tool is the "legal toolbox"

805 See BMP4, supra note 327, Introduction.

806 Cf. "BMP4 HRA Revision – Pragmatic Decision or Dangerous Gamble?" October 8, 2015, available at http://www.dryadmaritime.com/bmp4-hra-revision-pragmatic-decision-or-dangerous-gamble/ ("The measures implemented by BMP4, along with other international efforts, have effectively stemmed the tide of hijackings that
developed by the Working Group on legal issues (WG2) of the Contact Group on Piracy off the Coast of Somalia (CGPCS).\textsuperscript{807}

What characterizes the legal framework is therefore the adoption of new (or revised) non-binding, 'soft law', instruments, whose implementation took place under the umbrella of the existing 'hard law', namely UNCLOS and other applicable treaties such as the SUA Convention. This was complemented by supporting the enactment of or amendment to national legislation (antipiracy laws) to facilitate counter-piracy activities and in particular prosecution of pirates.\textsuperscript{808}

This approach enabled the counter-piracy community to act swiftly and efficiently, rather than dedicate its efforts to lengthy negotiations that typify the conclusion of formal and binding instruments. Yet, as a consequence of the heavy focus on adopting non-binding, ad hoc agreements and other instruments, those involved in combating piracy perhaps missed an opportunity to thoroughly examine ways to ameliorate the existing formal legal framework, notably UNCLOS. This could have taken place in parallel to – rather than instead of - the conclusion of informal instruments. For example, WG2 of the CGPCS could have dedicated parts of its discussions, in particular in its meetings that followed the decline in piracy incidents, were so prevalent in recent years"); S.C. Res. 1976, \textit{supra} note 167, where the UNSC commended “the efforts of the shipping industry, in cooperation with the CGPCS and IMO, in developing and disseminating the updated version of the Best Management Practices to Deter Piracy off the Coast of Somalia and in the Arabian Sea Area (BMP) and emphasizes the critical importance for the shipping industry of applying the best practices recommended in the BMP”).

\textsuperscript{807} See description of the activities of WG2, available at \url{http://oceansbeyondpiracy.org/matrix/contact-group-piracy-coast-somalia-cgpcs} ("WG2 has focused on encouraging apprehension, prosecution, and imprisonment of pirates within national legal systems and has developed a 'legal toolbox' to support states and organizations and strengthen their capacity to combat piracy at armed robbery at sea").

to examining possible amendments to UNCLOS or alternatively the possibility of concluding a
protocol that can supplement UNCLOS in areas such as extradition, mutual legal assistance, and
transfer of piracy suspects. Adopting such a protocol would not have remedied all of UNCLOS’
shortcomings, but could have served as a long-term legal framework that can better facilitate
counter-piracy undertakings in the future.

6.3. THE INSTITUTIONAL LANDSCAPE

Similar to the approach taken with regard to the legal framework, efficiency and informality
have been the guiding principles in defining the institutional landscape. As already noted, not a
single new formal and permanent international organization was created to counter piracy.\textsuperscript{809}
Though this may have been influenced by a regional approach to the piracy threats, it certainly
derived also from the reluctance of the international community to create new classic
international (or even regional) organizations with costly bureaucratic structures.

The discussion over the prosecution of Somali pirates illustrates the predominant role
efficiency considerations played in deciding whether to create new institutions. As mentioned,
the various proposals made to address this challenge included the creation of a dedicated
international piracy court or, as proposed by the Lang Report, establishing a Somali
extraterritorial jurisdiction court in Tanzania.\textsuperscript{810} These proposals were heavily debated at the
UNSC and other fora such as WG2 of the CGPCS.\textsuperscript{811} With regard to Mr. Lang’s proposal, for
example, some member on the UNSC (Russia, France, and Portugal) spoke strongly in favor,

\textsuperscript{809} See discussion \textit{supra} Chapter 4.
\textsuperscript{810} See discussion \textit{supra} Chapter 4.
\textsuperscript{811} Beekarry, \textit{supra} note 2, at 167 (fn 32).
while the US and UK strongly opposed it, “questioning whether a court in Tanzania would be practicable in such a short time frame.”

The report of the UK House of Commons Foreign Affairs Committee, released shortly after that debate at the UNSC, shows that the underlying reasoning behind the UK’s opposition to the creation of new international or extra-territorial tribunals included practical considerations, such as the significant possible cost (estimated in the report as possibly reaching $100 million a year). With regard to the proposal to create a new international court, the report also mentioned the difficulty raised by Professor Douglas Guilfoyle, who “questioned the viability of an international court, noting that delays would occur while rules of evidence and procedure were established.” The report concluded on this point by stating that “the [UK] Government was right to oppose the establishment of an extra-territorial Somali court as proposed in the Jack Lang report to try Somali pirates in a third country. We recommend that the Government set out in its response to this report its views on the more recent proposals for specialized anti-piracy courts established within regional states under ordinary national law.”

The strong position expressed by countries such as the U.S. and U.K against the creation of a new court or tribunal finally led to the decision to reject the various proposals and focus on prosecution in regional states. As clearly evidenced by statements such as those made in the report of the UK House of Commons Foreign Affairs Committee, that decision was largely

812 Dubner and Fredrickson, supra note 245, at 257 (quoting from the report of House of Commons Foreign Affairs Committee, supra note 789) [emphasis added].
813 Report of the House of Commons Foreign Affairs Committee, supra note 789, para. 89 (stating that “[t]he costs of bring [an extra-territorial] court up to standard and using it on an ongoing basis would be huge”); Dubner, id, at 259.
815 Idem, para. 92.
816 See discussion supra Chapter 4.
influenced by pragmatic considerations such as the expected costs and foreseen delays in creating new judicial mechanisms.\textsuperscript{817}

Without delving into a full survey of the various institutions involved in countering piracy,\textsuperscript{818} two additional examples illustrate the practical approach that has dominated the institutional landscape: The CGPCS and the Regional Anti-Piracy Prosecution and Intelligence Coordination Centre (RAPPICC).

\textbf{6.3.1. The Contact Group on Piracy off the Coast of Somalia (CGPCS)}

The CGPCS was created on January 14, 2009 pursuant to UNSC Resolution 1851, which encouraged “all States and regional organizations fighting piracy and armed robbery at sea off the coast of Somalia to establish an international cooperation mechanism to act as a common point of contact between and among states, regional and international organizations on all aspects of combating piracy and armed robbery at sea off Somalia’s coast.”\textsuperscript{819}

Though the CGPCS was established under the auspices of the UNSC, has regularly reported to the UNSC and has been consistently mentioned in its Resolutions, it does not form part of the UN system (whether as a UN agency, UN committee or other formal UN mechanism).

\textsuperscript{817} See also Beekarry, \textit{supra} note 2, at 165-166 (describing various arguments raised against the prosecution of pirates before an international court or tribunal, including the fact that “the costs associated with establishing and operating an international court have been acknowledged as prohibitive. Many argue that money is better spent facilitating prosecutions in regional and affected states and supporting efforts to build a stable government in Somalia. The same concerns apply to the length of time it may take to establish and staff such a court when the focus is on addressing the piracy scourge as immediately and as robustly as possible”).

\textsuperscript{818} For an examination of the institutional landscape cf. MARITIME PIRACY AND THE CONSTRUCTION OF GLOBAL GOVERNANCE, \textit{supra} note 31, Part II (Constructions through Institutions); Bueger, \textit{supra} note 636.

\textsuperscript{819} See S.C. Res. 1851, \textit{supra} note 189.
It is an international mechanism with a clearly defined thematic and geographic scope, which brings together various stakeholders affected by Somali piracy. It serves as a decentralized coordination mechanism on different levels (operational, legal, etc.) and a forum for discussing emerging problems, possible solution, and best practices.  

The CGPCS bears the following characteristics:

- **No permanent structure**: The CGPCS is an ad hoc loose network with neither a constituent instrument nor a permanent structure akin to a general secretariat of an international or a regional organization.

- **Flexibility**: Since the CGPCS has no formal “rule of speciality” that would limit its mandate (as is the case with international organizations), and due to the lack of governing rules and cumbersome institutional procedures, the CGPCS has been able to rapidly adjust its activities (e.g. by creating additional working groups) and enlarge its membership. It has been noted that the trade-off [of flexibility] “is limited visibility

---

820 An example of the facilitative role of the Contact Group is the work of Working Group 2 (on legal matters) on the transfer agreements of piracy suspects or convicts. As mentioned in the Report of the UN Secretary-General pursuant to Security Council resolution 1950 (2010), ¶ 67, U.N. Doc. S/2011/662 (Oct. 25, 2011): “Agreements on the transfer of convicted pirates were signed between the Government of Seychelles and the Transitional Federal Government, “Puntland” and “Somaliland”. These agreements were enabled by the efforts of the Contact Group on Piracy off the Coast of Somalia and will allow Seychelles to move convicted Somali pirates back to “Puntland” and “Somaliland” to serve their sentences.”

821 William Smith, “Dimensions of Legitimacy: Evaluating the Contact Group”, Working Paper of the Lessons Learned Project of the Contact Group on Piracy off the Coast of Somalia (CGPCS), P. 4, available at http://www.lessonsfrompiracy.net/files/2014/08/Smith-Legitimacy-of-the-Contact-Group.pdf (“Although it emerged as a response to a UN Security Council resolution, it was not formally established by such a resolution and thus lacks as clear mandate for its activities”).

and inclusiveness in agenda-setting and decision-making processes."\textsuperscript{823} The CGPCS, however, was conscious of the importance of communication and, to that end, created a dedicated working group (WG 4).\textsuperscript{824}

- **Informal membership**: Participation is voluntary and does not entail any legally binding obligations (no formal obligation to be bound by any decision taken, no membership dues, etc.). There is no formal admission process to admit new participants. This strengthens the legitimacy of the Group, since the voluntary participation can be taken as implicit or explicit consent to submit to its authority.\textsuperscript{825}

- **Inclusiveness**: Though the CGPCS began its activities with a small group of States and international or regional organizations (in line with UNSC Resolution 1851), the forum has rapidly grown to include not only more States and organizations, but also other stakeholders, notably representatives of the private sector (e.g. of the shipping industry) and NGOs. Engaging civil society is particularly interesting considering that somewhat constrained by diplomatic norms and processes, the group’s informal structure has allowed it to adapt its working methods, extend participation to non-state actors, and circumvent procedural constraints that can hamstring creativity and efficiency in finding solutions to problems”).

\textsuperscript{823} Idem.

\textsuperscript{824} Working Group 4 (WG4) of the CGPCS was tasked with improving diplomatic and public information efforts on all aspects of piracy and using messaging and outreach strategies to raise awareness of the dangers of piracy and inform the public in the area and abroad of the dangers posed by piracy – see http://oceansbeyondpiracy.org/matrix/contact-group-piracy-coast-somalia-cgpcs.

\textsuperscript{825} Smith, \textit{supra} note 821, P. 3.
organizations and networks dealing with military or law-enforcement matters are often suspicious of collaboration with non-state actors and therefore tend to be exclusive.826

- **Multiagency**: Different than certain international and regional organizations, where States representatives are designated from a single type of States agencies (e.g. INTERPOL or Europol, both of which bring together law-enforcement officials of their members), participants at the CGPCS’ activities included representatives of different ministries and agencies. Though the thematic CGPCS working groups typically included representatives from similar agencies (e.g. WG1 on operational aspects with representatives from navies; WG2 on legal issues with representatives from ministries of foreign affairs or justice), the interaction between the working groups under the umbrella structure of the CGPCS enabled cross-cutting, multiagency deliberations and coordination.827

- **Horizontal paradigm**: The CGPCS has no hierarchical relations. It does not adopt formal binding resolutions or a similar format of decisions.828 Instead, it relies on soft mechanisms, such as consensual decision-making and mobilizing praise and blame as a form of peer pressure.829 The documents it has produced such as “toolkits”, “non-papers”, and “chairman’s conclusions” are of hortatory nature and aim at facilitating the

---

826 In that regard see also Smith, *supra* note 821, P. 8 (“As defence and security has traditionally been dominated by states and states-based organizations, it is surprising that the Contact Group has, from the start, included non-state actors within its activities”).

827 In that regard, see also Danielle A. Zach et al, *supra* note 822 (“Given that piracy is a cross-cutting issue area involving multiple ministries/departments within governments (e.g., defense, transportation, foreign affairs, finance), the contact group has cultivated horizontal linkages among national bureaucracies”).

828 Smith, *supra* note 821, P. 2 (“Along with similar informal policy networks in the global realm, the Contact Group does not have the power to enforce compliance with its recommendations”).

829 Zach et al., *supra* note 822, P. 33.
deliberations over the counter-piracy initiatives. Chairmanship of the entire group or of its thematic working groups rotates among participating States and organizations on a voluntary basis and without former elections.

Thus, by its very essence, the CGPCS is a different type of mechanism in comparison to classic international organizations. Nonetheless, it would be inaccurate to view it as completely departing from traditional concepts of international governance. In particular, despite having included actors from the private and non-governmental sectors, the discussions and deliberations were led primarily by States, often the powerful ones.\textsuperscript{830} It is also important to bear in mind that the CGPCS has operated as a complementing mechanism to established ones (such as UNSC and IMO); it would be therefore premature to assert that a loose-type network similar to the CGPCS can or should completely replace existing organizations. Finally, the creation of an ad hoc global policy network is not unprecedented; as has been noted, the CGPCS “has design and operational features that render it part of a family of global governance networks that have proliferated in recent years.”\textsuperscript{831}

All in all, the CGPCS has been considered as a successful initiative. It fostered the emergence of an anti-piracy community and cultivated horizontal linkages among national bureaucracies.\textsuperscript{832} It was described by one participating State as a “remarkably - perhaps uniquely - effective ad hoc construct”,\textsuperscript{833} whose concerted efforts contributed to the significant drop in

\textsuperscript{830} Zach et al., supra note 822, Introduction. (“the CGPCS is almost as state-centric as its counterpart UN and regional organizations—undeniably power lies with states, and particularly the most resourced among them”); see also Smith, supra note 821, P. 8 (“As in many other global governance networks, a core group of Western powers are particularly influential within the Contact Group”).

\textsuperscript{831} Smith, supra note 821, P. 8.

\textsuperscript{832} Zach et al., supra note 822, Introduction.

piracy incidents off the coast of Somalia. As also noted in 2014 by the Chairperson of the CGPCS: “The Contact Group on piracy is unique. It is a laboratory for innovative multilateral governance to address complex international issues. The great thing is that it is delivering.”

The CGPCS can therefore serve as a useful model to address other emerging threats that call for international or regional collaboration. One recent example for a regional network that is intended to bear similar characteristics to CGPCS (voluntary participation, flexible and horizontal forum) is the Indian Ocean Forum on Maritime Crime (IOFMC), created in 2014 by UNODC. IOFMC’s purpose is to provide a regional network between states in order to coordinate their responses to maritime crime concerns at the diplomatic, strategic and capacity-building levels. It is an initiative that will partner with regional and international organizations with a common interest. In a different domain, the creation in September 2014 of the Global Coalition to Counter ISIL bears some resemblance to the model of CGPCS (horizontal, loose network, etc.).

834 Idem, P. 1.

837 On the creation of the Global Coalition to Counter ISIL and its main objectives see the U.S. State Department site at http://www.state.gov/s/seci/.
6.3.2. The Regional Anti-Piracy Prosecution and Intelligence Coordination Centre (RAPPICC)

Less known than the CGPCS but legally speaking no less interesting is the Seychelles-based Regional Anti-Piracy Prosecution and Intelligence Coordination Centre (RAPPICC). The creation of the Centre was announced during the February 2012 London Conference on Piracy and Somalia. Temporary offices opened on 1 June 2012, with the permanent building completed by January 2013. The creation of the new Centre and its on-going activities were also mentioned in UNSC Resolutions.

The RAPPICC was intended to bring together military and law enforcement capabilities in fighting piracy by facilitating the tracking of pirates and enforcement action against pirate financiers and leaders. Though it was originally meant to focus on piratical activities, shortly after its creation the Centre’s mandate was broadened to encompass three interlinked missions: A Transnational Organised Crime Unit (TOCU), a Maritime Trade Information Sharing Centre (MTISC) and a Local Capacity Building Coordination Group (LCBCG). The Center’s work

---

840 See S.C. Res. 2077, supra note 248, (the UNSC noted that “the ongoing initiative aimed at establishing the Regional Anti-Piracy Prosecution & Intelligence Coordination Centre, hosted by the Republic of Seychelles”); S.C. Res. 2125, supra note 353 (the UNSC took note “of the ongoing efforts of the Regional Fusion and Law Enforcement Centre for Safety and Security at Sea (formerly the Regional Anti-Piracy Prosecution and Intelligence Coordination Centre), hosted by Seychelles to combat piracy.”) Similar references were made later in S.C. Res. 2184, supra note 353, and S.C. Res. 2246, supra note 353.

841 See House of Commons Foreign Affairs Committee, supra note 789, para. 120.

has thus been expanded to also address other forms of organized transnational maritime crime such as human trafficking, drug smuggling and environmental crime.\textsuperscript{843} To better reflect its new mandate, the Centre was renamed and is currently called the Regional Fusion and Law Enforcement Centre for Safety and Security at Sea (REFLECS3).

The Centre was created based on a partnership agreement between the Seychelles, the United Kingdom, the Netherlands, Australia, Norway, and the United Arab Emirates.\textsuperscript{844} Its membership was later expanded to include the United States as well as two international partners - the International Maritime Organization (IMO) and the UNODC. Thus, different than regional organizations such as the European Union or the African Union, whose membership is typically comprised of regional States, the term “regional” in this context refers to the geographical area covered by the Centre rather than its membership. While it is not exceptional for regional bodies to include members from outside the region,\textsuperscript{845} it is uncommon to have a regional center with only one member (Seychelles) located in the region concerned.\textsuperscript{846}

\textsuperscript{844} The partnership agreement and other legal texts of the RAPPICC are on file with this author.

\textsuperscript{845} See, for example, the Singapore-based center established based on the Regional Cooperation Agreement on Combating Piracy and Armed Robbery against Ships in Asia (ReCAAP), whose contracting parties include States from various regions in the world such as Australia, China, the United Kingdom and the United States – see ReCAAP’s website at http://www.recaap.org/AboutReCAAPISC.aspx/.

\textsuperscript{846} As mentioned supra Part 5.4.2, this shortcoming led to the announcement that “[T]he Steering Group [of the Centre] also decided to invite countries from the East African and South Asian regions to join as new members” – See supra note 720.
Perhaps the most innovative aspect of the Centre is its legal basis: The Centre has been created as a “joint investigative body” pursuant to Article 19 of UNTOC. This provision reads as follows:

“Article 19: Joint investigations

States Parties shall consider concluding bilateral or multilateral agreements or arrangements whereby, in relation to matters that are the subject of investigations, prosecutions or judicial proceedings in one or more States, the competent authorities concerned may establish joint investigative bodies. In the absence of such agreements or arrangements, joint investigations may be undertaken by agreement on a case-by-case basis. The States Parties involved shall ensure that the sovereignty of the State Party in whose territory such investigation is to take place is fully respected.”

The creation of a joint investigative body under Article 19 is arguably the most advanced form of joint undertaking under the auspices of UNTOC. In comparison with the more limited measures of cooperation provided for by Article 27 of the Convention, which provides lawful authority to enhance and establish channels of communication between competent authorities, the concept of a joint investigative body exceeds the coordination of investigative actions to encompass the co-sharing of investigative powers.

---

848 UNTOC. A similar provision was included in Article 49 of UNCAC.
Conducting joint investigations – frequently (though not exclusively) done by neighboring countries, is certainly not new in the law-enforcement world.\footnote{See, for example, Bruce Zagaris, \textit{U.S. International Cooperation against Transnational Organized Crime}, 44 Wayne L. Rev. 1401 1998-1999 (describing various joint investigations involving the U.S. even before the conclusion of UNTOC). Among European Union countries, a convention concluded in 2000 provides for detailed provisions on the creation of Joint Investigative Teams (JITs) – see Article 13 of the Convention on Mutual Assistance in Criminal Matters between the Member States of the European Union [the “EU MLA Convention”).} Indeed, domestic laws of many States already permit such joint activities, and for those few States whose laws do not so permit, Article 19 of UNTOC can serve as a sufficient source of legal authority for case-by-case cooperation of this sort.\footnote{See UNODC Toolkit on Human Trafficking, available at https://www.unodc.org/documents/human-trafficking/Toolkit-files/08-58296_tool_5-10.pdf.}

Joint investigations teams would typically be created for a specific purpose and a limited period.\footnote{Article 13.1 of the EU MLA Convention.} Conversely, it was concluded that a “joint investigative body” pursuant to Articles 19 UNTOC is distinct from both a “joint team” and “joint investigation” in that this was intended to be a more permanent structure formed on the basis of a bilateral agreement.\footnote{See Draft Informal Expert Working Group on Joint Investigations: Conclusions and Recommendations, 2 to 4 September 2008, Vienna, available at https://www.unodc.org/documents/treaties/COP2008/crp5.pdf.}

As previously noted, UNTOC does not specifically address maritime piracy, yet there is little doubt that the Convention may apply to piracy activities that qualifies as organized criminal activity in the meaning of the Convention.\footnote{See discussion \textit{supra} in Parts 2.7 and 4.2.} Accordingly, using Article 19 of UNTOC as the legal basis to create a joint investigative body to combat maritime piracy (and later on to expand its activities to combating other criminal activities) is \textit{a priori} legally sound.
One of the main advantages in creating joint investigation teams is the simplifications of activities that would otherwise be governed by the more cumbersome rules of mutual assistance.\textsuperscript{855} To that end, a JIT would typically imply the creation of a new official legal entity, the team itself, with its own investigative functions and investigative powers.\textsuperscript{856}

With regard to RAPPICC, however, its creation under Article 19 of UNTOC left the question of its legal status and governing rules uncertain. Unlike Article 13 of the EU MLA Convention, Article 19 of UNTOC does not describe the main characteristics of joint investigative bodies.\textsuperscript{857} It is therefore unclear which law governs the activities of the Centre.\textsuperscript{858}

The problem is compounded by the nature of the Centre’s activities, which requires the collection, exchange, and storage of personal data such as names of suspected pirates and their identifiers (DNA, fingerprints, etc.). While national legislations of most members of the Centre provide for adequate data protection rules and guarantees, it is not entirely clear to what extent they govern the storage of data in the Centre’s databases. The Centre’s webpage indicates that “with regard to the application and observance of the European Convention on Human Rights, the Centre abides absolutely by the principles enshrined within the ECHR regarding an individual’s right to privacy, effective data-security and rigorous application of data-storage rules. This ensures the Centre holds no material for any period longer than that strictly necessary to conduct a lawful and justified enquiry.”\textsuperscript{859} Nonetheless, it remains uncertain to what extent

\textsuperscript{855} Digest of Organized Crime Cases, \textit{supra} note 849, p. 75 (making a reference to Article 13.7 of the EU MLA Convention).
\textsuperscript{856} \textit{Idem}, P. 72.
\textsuperscript{857} \textit{Idem}.
\textsuperscript{858} Compare to Article 13.3(b) of the EU MLA Convention, according to which “[T]he team shall carry out its operations in accordance with the law of the Member State in which it operates.”
\textsuperscript{859} See RAPPICC’s website at \url{http://www.rappicc.sc/page11.html}.  

253
this general statement has been reflected in specific regulations that govern the retention of data in the Centre’s databases. Since it is unclear which laws govern the functioning of the Centre, it is also unknown which data protection authority, if any, oversees the recording of personal data in its databases. This may pose difficulties for individuals who wish to know whether they are known in the Centre’s databases and seek that the information concerning them be modified or deleted.

These difficulties can also negatively affect potential cooperation with other organizations as well as States not party to the Centre, whose rules allow exchange of personal data only with bodies that have a distinct legal personality and have adequate data processing rules. It is therefore unsurprising that the Seychelles government indicated its intention to enact legislation to incorporate the Centre as a legal entity, yet, to date this has not taken place.

The creation of RAPPICC therefore serves as a good example for both the advantages and shortcomings of the informalization of international law: On the one hand, using the platform of a modern convention (UNTOC), RAPPICC was established in a relatively short time and without the lengthy and costly procedures associated with the adoption of an international instrument for the purpose of creating a new international or regional organization. The nature of a joint investigative body under Article 19 of UNTOC enables overcoming cumbersome MLA procedures, that could have been particularly difficult between European countries and the Seychelles since no MLA agreement exists among those countries.

860 Compare, for example, to the rules governing the processing of data in INTERPOL’s databases, available at http://www.interpol.int/About-INTERPOL/Legal-materials/Data-protection.

861 See “Contact Group on Piracy off the Coast of Somalia: Quarterly Update”, supra note 720.
At the same time, the fact that emphasis was put on rapid creation of a body without clear legal status hampers the core activities of the RAPPICC. Notably, it can pose legal and practical difficulties related to compliance with data protection principles and consequently might also prevent the sharing of information with the Centre, which is its very core function. Finally, the ambiguity associated with the nature of the Centre and its governing law also raises concerns over the transparency in which it operates.\footnote{862 As of October 2016, namely more than four years after its creation, the Centre’s website (http://www.rappicc.sc/index.html) has yet to make publicly available its constituent instruments and governing rules.}

\section*{6.4. CONCLUSION}

Pirates were described as “profit seeking, rational utility maximizers”.\footnote{863 William & Pressly, supra note 636, at 192.} To counter their practical business model, the international community has strived to implement a pragmatic paradigm.\footnote{864 See Saiful Karim, supra note 693, at 92 (“The global community should follow a policy that is pragmatic and implementable”); Douglas Guilfoyle, \textit{Counter-piracy Law Enforcement and Human Rights}, 59 Int'l & Comp. L.Q. 141, 142 (2010) (“One-size-fits-all solutions have been eschewed for a pragmatic range of national and international mechanisms”).} This approach was not driven only by utilitarianism or a narrow cost-effective rational; it was also guided by the fact that many of the challenges posed before the international community were, in essence, practical ones.\footnote{865 See Beekarry, supra note 2, at 163 (“Too often the problems encountered were more practical than jurisdictional: Where to prosecute? How to investigate? How to overcome language barriers? How to judge the sufficiency of evidence?”); see also discussion in supra Chapter 2 of some practical difficulties arising from collaborations between navies-law enforcement-private sector (e.g. question of classification of information by navies).}
The legal framework and the institutional landscape, reflecting this paradigm, possess similar characteristics that can be described as a three-prong approach:

- Reliance on already existing traditional instruments or mechanisms (e.g. UNCLOS, SUA, UNTOC for the legal framework; UNSC, IMO, and UNODC as some institutional examples).

- Complemented by newly-created informal and mostly cost-effective ones (ad hoc, non-binding agreements and arrangements for the legal framework; creation of loose networks such as the CGPCS or legally-innovative bodies such as RAPPICC).

- Reinforced through bolstering national legislation and institutions (enacting or amending national anti-piracy laws; strengthening capacities of national courts in regional states, etc.).

The pragmatic paradigm has not been without challenges and shortcomings, both legal and practical, some of which (e.g. lack of transparency) were mentioned in this chapter while others (e.g. the creation of new communication networks that often work in isolation) were described in earlier ones. The lessons learnt, however, can assist the international community in better addressing present and future threats.
