### Chapter 2: Noncanonical Unambiguity Test

2.4 LR(k) Test

2.4.1 Measurements and Analysis

2.5 Noncanonical Unambiguity Test

2.5.1 Measurements and Analysis

2.6 Comparison

2.7 Evaluation

2.8 Conclusions

2.8.1 Discussion

### Chapter 3: Faster Ambiguity Detection by Grammar Filtering

3.1 Introduction

3.2 Filtering Unambiguous Productions

3.2.1 Preliminaries

3.2.2 The Noncanonical Unambiguity Test

3.2.3 LR(0) Approximation

3.2.4 Finding Ambiguity in an item₀ Position Graph

3.2.5 Filtering Harmless Production Rules

3.2.6 Grammar Reconstruction

3.3 Experimental Validation

3.3.1 Experiment Setup

3.3.2 Experimental Results

3.3.3 Analysis and Conclusions

3.3.4 Threats to validity

3.4 Conclusions

3.5 Appendix: Updated Measurement Results

3.5.1 Improved Implementation

3.5.2 Analysis

3.5.3 Effects on Sentence Generation Times

### Chapter 4: Tracking Down the Origins of Ambiguity in Context-Free Grammars

4.1 Introduction

4.1.1 Related Work

4.1.2 Overview

4.2 Preliminaries

4.2.1 Context-Free Grammars

4.2.2 Bracketed Grammars

4.2.3 Parse Trees

4.2.4 Ambiguous Core

4.2.5 Positions

4.2.6 Automata

4.3 Regular Unambiguity Test

4.3.1 Position Automaton

4.3.2 Approximated Position Automaton

4.3.3 The item₀ Equivalence Relation
6.2.1 Requirements ............................................. 94
6.2.2 Architecture and Design ................................. 94
6.2.3 Implementation Details ................................. 96
6.3 Sentence Generator ......................................... 98
   6.3.1 Requirements ........................................ 98
   6.3.2 Architecture and Design ............................. 98
   6.3.3 Implementation Details ............................. 100
6.4 Usage ..................................................... 101
6.5 Conclusion ............................................... 103

7 Parse Forest Diagnostics with DR. AMBIGUITY .......... 105
   7.1 Introduction ............................................. 105
       7.1.1 Preliminaries ....................................... 108
   7.2 Solutions to Ambiguity ................................. 109
   7.3 Causes of Ambiguity .................................... 112
       7.3.1 Classes of Parse Tree Differences ............... 113
   7.4 Diagnosing Ambiguity ................................... 115
       7.4.1 Architecture ....................................... 115
       7.4.2 Algorithms ........................................ 117
       7.4.3 Discussion on Correctness ....................... 119
   7.5 Demonstration .......................................... 120
       7.5.1 Evaluation Method ................................ 120
       7.5.2 Results ........................................... 121
       7.5.3 Discussion ........................................ 123
   7.6 Conclusions ............................................ 123

8 Conclusions ................................................ 125
   8.1 Contributions to Research Questions .................. 125
   8.2 Discussion .............................................. 127
   8.3 Future Work ............................................ 128

Bibliography .................................................. 131

Summary ....................................................... 139

Samenvatting .................................................. 141
