Table of contents

Chapter 1  11
Introduction and outline thesis

Future Cardiol. 2009; 5(4):385-402 and “Mechanical Reperfusion for STEMI: From Randomized Trials to Clinical Practice”

Part 1: Proximal embolic protection in ST-segment elevation myocardial infarction

Chapter 2  35
Proximal embolic protection with aspiration in percutaneous coronary intervention of acute myocardial infarction using the Proxis device

Chapter 3  51
Randomized comparison of primary percutaneous coronary intervention with combined proximal embolic protection and thrombus aspiration versus primary percutaneous coronary intervention alone in ST-segment elevation myocardial infarction: Proximal Embolic Protection in Acute myocardial infarction and Resolution of ST-Elevation (PREPARE)

Chapter 4  73
Infarct size and left ventricular function in the proximal embolic protection in acute myocardial infarction and resolution of ST-segment elevation (PREPARE) trial: ancillary cardiovascular magnetic resonance imaging study

Heart 2010; 96:190-195

Chapter 5  87
Proximal embolic protection in patients undergoing primary angioplasty for acute myocardial infarction (PREPARE): core lab adjudicated angiographic outcomes of a randomized controlled trial

Netherlands Heart Journal; accepted
Part 2: Biomarkers of reperfusion in ST-segment elevation myocardial infarction

Chapter 6  101
Comparison of usefulness of N-Terminal pro Brain Natriuretic Peptide as an independent predictor of cardiac function among admission cardiac serum biomarkers in patients with anterior wall versus non-anterior wall ST-segment elevation myocardial infarction undergoing primary percutaneous coronary intervention
*American Journal of Cardiology;* 2010; 105(8): 1065-1069

Chapter 7  113
Comparison of the usefulness of N-terminal pro Brain Natriuretic Peptide to other serum biomarkers as early predictor of ST-segment recovery after primary percutaneous coronary intervention
*American Journal of Cardiology;* 2010; 105(8): 1047-1052

Chapter 8  131
Feasibility and applicability of computer-assisted myocardial blush quantification after primary percutaneous coronary intervention for ST-segment elevation myocardial infarction
*Catheter Cardiovasc Interv.;* 2010; 75(5):701-706

Chapter 9  147
Quantitative blush evaluation during primary percutaneous coronary intervention predicts functional and contrast-enhanced cardiovascular magnetic resonance outcomes in patients with ST-segment elevation myocardial infarction
*Catheter Cardiovasc Interv.;* 2010, June 1

Chapter 10  163
The impact of early, late and no ST-segment resolution measured by continuous ST Holter monitoring on left ventricular ejection fraction and infarct size as determined by cardiovascular magnetic resonance imaging
*Journal of Electrocardiology;* accepted
Chapter 11  181
Early ST-segment recovery after primary percutaneous coronary intervention accurately predicts long-term prognosis after acute myocardial infarction
*American Heart Journal*; 2010; 159(6): 1005-1011

Chapter 12  197
Prediction of one-year mortality with different measures of ST-segment recovery in all-comers after primary percutaneous coronary intervention for acute myocardial infarction
*Circulation: cardiovascular quality and outcomes*; accepted

Chapter 13  217
Clinical and angiographic predictors of ST-segment recovery after primary percutaneous coronary intervention
*American Journal of Cardiology*; 2010; 105(12):1692-1697

Chapter 14  233
ST-segment resolution prior to primary percutaneous coronary intervention is a poor indicator of coronary artery patency in patients with acute myocardial infarction

Chapter 15  251
Relation between the assessment of microvascular injury by coronary Doppler flow velocity measurements and cardiovascular magnetic resonance in patients with acute anterior wall myocardial infarction
*J Am Coll Cardiol. 2008; 51(23):2230-8*

Chapter 16  273
Summary and conclusions 275
Samenvatting en conclusies 285

Chapter 17  295
Dankwoord 297
List of publications 303
Curriculum Vitae 307
