Finally I am finished with this dissertation and very delighted to write this last bit of it. I feel quite humble and thankful to Almighty God Who has bestowed me with courage to fulfill this task and facilitated for me to reach, where I am today. I could never thank Him enough for the countless blessings He Has always showered upon me, not just in terms of material resources but also in form of many marvelous souls who have been a part of my life, directly or indirectly. Writing my doctoral thesis was not possible without the help of many wonderful people I want to delightfully acknowledge.

First of all I would like to express my deepest gratitude to my supervisor Professor Fred Brouwer who has been very helpful during my PhD studies. Indeed I am very fortunate to be his PhD student and feel proud to be part of his dynamic research group. I appreciate his contributions towards my education, his motivating attitude and excellent teaching. Throughout my research work and thesis-writing phase he provided me excellent opportunities, sound support and continuous encouragement. It is hard to summarize my appreciation for him in few words. Certainly my doctoral thesis would not have been possible without his countless efforts and brilliant guidance (Thank you Fred I learnt a lot of good things from you in my life).

I warmly thank Prof. J. W. Verhoeven, Prof. W. J. Buma, Prof. Dr. J. A. Loontjens, Dr. B. de Bruin, Dr. P. J. A. Geurink and Dr. T. Nabuurs who have been so kind to accept the request of being my defense committee member.

The members of Molecular Photonics group especially Prof. Wybren Jan Buma, Dr. René Williams, Dr. Sander Woutersen and Dr. Hong Zhang have had their immense contributions towards my professional training whether it was in the form of individual discussions or useful suggestions in the group meetings. I found René Williams a very friendly and generous personality, always ready to help and very considerate (thank you for the discussions and endless support). I greatly acknowledge Dr. Sander Woutersen for his utmost encouraging and motivating attitude. He practically infuses confidence in people around him by lending his ears and giving them special attention during group meetings.

During my PhD project a considerable amount of work was done at DSM NeoResins Waalwijk and I wish to extend my thanks to a team of very professional and helpful people over there. Among them Dr. Tijs Nabuurs is the first one to whom I pay my warm
gratitude. He has had an auspicious influence over my research project. Owing to his useful suggestions and talented guidance, I was able to produce amazing results especially in the co-solvent partitioning experiments discussed in Chapter 3 and 4. He patiently answered all my questions and has been very generous in sharing bright ideas that helped me produce positive results. Dr. Ronald Tennebroek is warmly thanked not just for the useful discussions but also for his friendly and motivating attitude, which helped me quickly adapt to atmosphere at DSM NeoResins Waalwijk. For preparation of my emulsion polymers, I cordially thank Koen Biemans for helping and teaching me emulsion polymerization. He is very professional in his approach towards science and has very sound conceptual and practical knowledge. Dr. Paul Cools and Ton Brooijmans are extensively thanked for helping me in fluorescence coupled GPC and HPLC experiments.

I acknowledge Dutch Polymer Institute (DPI) for the support to my research project. Harold Gankema, Jan van Haare and members of DPI cluster meetings are warmly appreciated for the valuable discussions and encouragement.

I express warm gratitude to my paranimfen Dr. Deniz Günbas and Tatu Kumpulainen. Deniz and I have spent a very memorable and pleasant time during last four years. We enjoyed a great deal, travelling and staying together in Lunteren, Maastricht and Berlin, not to mention the scrumptious Turkish cuisine, Deniz introduced me to (this has to be my new indulgence as now; one thing that is on priority in my to-do list is learning Turkish recipes 😊). Tatu, despite joining us just recently, has already impressed me with his amicable nature and considerate personality (thank you for being my paranimf).

I would like to take this opportunity to especially thank Dr. Arnaud Spangenberg for his thorough help on the confocal microscope and discussions on my experiments. He was ever so generous to teach me the operational know-how of confocal microscope and clearly explained the technical details, which enabled me successfully produce 2D and 3D results of my polymers labeled with various fluorophores (thanks! your contributions were very helpful indeed). I want to pay special regards to Amélie Spangenberg whose cordial hospitality and delicious French cuisine has enormously inspired me (and certainly Louis was one of the major attraction to visit you 😊).

I am very appreciative to John van Ramesdonk who provided me technical guidance for the instruments. He is not only a successful organic chemist but to my surprise a wonderful cook too (thanks for the delicious meal and warm hospitality). I greatly appreciate Thea for her friendly attitude (enjoying melodious tunes on your accordion was awesome!).

Michiel Hilbers, Michiel Groeneveld, Dick Babelaar are warmly appreciated for their help on the lasers. Steven Kettelarij is thanked for the synthesis of fluorescent dyes for my
confocal microscopy experiments. Bert Bakker and I shared same office and I cannot forget the wonderful time I spent with him (thank you for helping me in understanding Dutch language, translating my Dutch documents, useful scientific discussions and chit chat over coffees 😊). Hans is thanked for his encouragement. Jan Geenevasen is warmly thanked for his help on the NMR.

Many cordial thanks to all my colleagues in Molecular Photonics group: Vän Anh (I have enjoyed a lot with you always especially Keukenhof visit and Maastricht summer school are wonderful memories. Vietnamese cuisine and your kind hospitality have been very inspiring), Chantal Carpentier, Marcel Plugge, Wang Yu, Mathijs Panaman, Sérgio Domingos, Adriana Huerta, Tibert van der Loop, Heleen Meuzelaar, Alisa Rupenian, Eric Tan, Rolf Sitters, Liu K: some former members Dhiredj Jagesar, Emile Mes, Alessandro Vozza, Pablo Cotreras, Joanna Siekierzycka (thanks for helping me on confocal microscope), Szymon Smolarek, Qin Wenwu, Anouk Rijs, Daniel Shaw and Pavol Bodis, my students: Illona, Iris Dijkhuizen, Jannie Vos and Dayinta Perrier.

In addition to scientific community, there is a group of very cooperative and wonderful people who have helped me a lot during last four years. I extend my warm appreciation to Mrs. Trúc Ngô (it was wonderful experience to be in touch from time to time), Nicole Vastenhout, Ineke Weijer and Hilde Zwaan (thank you for help in HRSMC events, Maastricht summer school was a delightfully memorable time), Renate Hippert, Petra Hagen and Maureen Sabandar.

I owe my special gratitude to Marijke Duyvendak as without her my thesis could not be in the shape, it is now. Her continued support helped me get full text of articles, which were not available, online in UvA library. Besides I thank all the people at Chemistry library for their help in getting literature and books.

I must not forget to thank my office Pakistan Council of Industrial and Scientific Research (PCSIR) Lahore, Pakistan who allowed me to carry on my PhD studies in The Netherlands. Dr. Shahid Mahmud, Dr. Amran Waheed, Madam Razia Khanum, my friends: Sania Mazhar (it was really delightful time we spend together during my visit of Vienna and yours of Amsterdam 😊, I wish you a very good luck in your thesis), Filza Zafar Khan and Shumailla Usman are warmly thanked for their endless support and help. Dr. Humaira Masood Siddiqi at Quaid-i-Azam University Islamabad is warmly thanked for her support and guidance. At this point, I would like to thank all my teachers of primary school, high school, college and universities, I wouldn’t have done it without them.

It is my immense pleasure to warmly and wholeheartedly thank Abdul Haq Qazi and his amazing family. Mr. Haq has been very helpful to me and it is hard to summarize it in few words. I thank him for helping me get through my difficult times during my stay in The
Netherlands (borrowing your MacBook for fixing my Chapters was the one, I must emphasize in particular). Afia A. H. Qazi a gorgeous lady is very dear to me and I find myself very lucky to be her friend. She was always there when I needed to have a patient listener (I am particularly a fan of your exceptional knowledge and outstanding kitchen skills 😊). There are four brilliant and bright stars Hassaan A. Qazi, Anas A. Qazi, Zainab A. H. Qazi and Haalah A. H. Qazi holding a special contribution in my doctoral dissertation. In the hard time during my writing I was always encouraged by the innocent prayers of these kids and find myself very fortunate to be in their prayers. Haalah dear your shintli anti is so thankful to you for spending such marvelous and memorable time with her (visit to Sea Life, Scheveningen and Noordwijk was touch wood 😊).

Finally and most importantly, I wish to thank my loving parents. I always fall short of words to express gratitude for their countless efforts and contributions towards me. Their support, motivation and love have been a tremendous treasure for me. I dedicate my thesis to these two beautiful persons in my life (thank you for instilling in me a drive for education). My brother Haseeb M. Raja has always been very helpful and supportive to me. I cannot forget the time when he was trying to convince me to travel to Amsterdam and avail the opportunity of higher education (believe me it was a milestone in my life). Atiq M. Raja, my brother has undoubtedly been a pillar of support for me through every thick and thin (thank you for your endless support and the lovely gifts 😊, the memorable time I spent in London was truly because of you and Haania). I extend my thanks to Hunzila Shaffi for sharing her precious time and providing me a peaceful stay at her home. I pay my special thanks to Ghazala Tariq (you always have been so much caring and kind to me), Dr. Shehla Ayub (your love is my treasure) and Dr. Muhammad Ayub (for kind prayers). Warda Mahnoor, Ali Jarar, Ali Abdullah, Umama R. Ayub (a genius child), Haania N. Haseeb (you have given me the real happiness 😊), Ayesha R. Ayub, and Ayeza Haseeb are especially thanked for filling my life with the beautiful moments and giving me reasons to be happy. May God bless you all! Amen.

Tanzeela

Amsterdam, April 2011
