You will be contacted as soon as possible.

Table of Contents

Chapter 1	Introduction	9
Chapter 2	Study design	17
Chapter 3	The dilemma of selecting suitable proximal carious lesions in primary molars for restoration using the atraumatic restorative treatment (ART) approach	31
Chapter 4	Influence of cavity-size on the survival rate of proximal ART restorations in primary molars	43
Chapter 5	Influence of different isolation methods on the survival of proximal ART restorations in primary molars after two years	57
Chapter 6	Influence of the experience of operator and assistant on the survival rate of proximal ART restorations – two-year results	67
Chapter 7	Two-year survival of proximal ART restorations in relation to GIC brand and post-restoration meal consumption	81
Chapter 8	Effects of plaque, residual caries and cervical marginal gaps on the 2-year survival rate of proximal ART restorations	95
Chapter 9	Two-year survival of glass ionomer sealants placed as part of proximal ART restorations	107
Chapter 10	ART class II restoration loss in primary molars: re-restoration or not	117
Chapter 11	General discussion, conclusions and recommendation for future research	127
