Acknowledgement

Over the past five years, it has been an honour for me to interact with many people who have given me a lot of their time, companionship and professional assistance that helped me in completing this thesis. I wish to heartily thank the Vice-Chancellor of the University of Nairobi, Prof. Magoha for giving me an opportunity to undertake this research work. I am greatly indebted to Dr M. Vervoorn, Director of Educational Affairs, ACTA and Prof. dr. Paul Wesslink, Voorzitter, Dept of Cariology Endodontology Pedodontology (CEP), ACTA, for their assistance to the research through ACTA Student foreign Programme. I am also grateful to the sectie pedodontologie, of the Department of CEP (ACTA), for providing me with research facilities all the time I needed them during the entire study period.

I owe my deepest gratitude to my promotor Prof. Dr. Cor van Loveren who arduously guided me in many ways and with unwavering dedication and commitment in improving the quality of this thesis. His knowledge and experience brought great value to the final document. I am deeply grateful to my co-promotor dr. Willem Evert van Amerongen for the support in the realization of this dream, and for his mentorship and outstanding scientific and material contribution that surpassed every imagination. Indeed it has been a privilege for me to have the two lead me in this research work. I also extend my appreciation to my Kenyan supervisor and colleague, Prof. Gladys N. Opinya for her support during the study and for the evaluation of various parts of this thesis: I also appreciate the constructive criticisms made by many of the academic members of staff at the School of Dental Sciences, University of Nairobi. All these contributions helped to improve the quality of the results of this research work. I am indebted to the members of the Doctorate Committee, namely, prof dr Paul Wesselink, prof dr R. van Waas, prof dr Taco Pilot, dr Jaap SJ Veerkamp and Martine C.M.van Gemert-Schriks for devoting their valuable time and for contributing very constructive comments that has helped to improve the final presentation of this thesis.

I am, very grateful to The Netherlands Universities' Foundation for International Cooperation (NUFFIC) for the financial support that made it possible to undertake this study. I appreciate the support and contribution made to this study by the Deans Committee and the Department of Paediatric Dentistry/Orthodontics, University of Nairobi. I am also deeply grateful to my friend and mentor Prof. Kenneth Mavuti, and to Dr. Thomas Achia and Ms. Beatrice Wanjala, all from the University of Nairobi, and Dr. Samuel Mwalili from the Department of Statistics & Actuarial Sciences, Jomo Kenyatta University of Agriculture and Technology, for their wise counsel and guidance during the period of the study.

This research work would not be possible without the participation of the Children, teachers and parents of the 30 schools, namely, Kangundo AIC, Kangundo DEB, Kathaana, Kathithyamaa, Katwii Girls, Katwii Boys, Kawathei SA, Kikaatini, Kikalu, Kalandini, Kilalani, Kitongi, Kwatombe, Kyai, Kyamulendu, Kyaume, Matetani, Matungulu AIC, Mbondoni, Mukalwa, Mukalwa Junior, Mulingana, Nguluni, Nguluni Township, Sengani, Syanthi, Tala Boys, Tala Girls, Tala SA and Tala Township. I sincerely thank all the children, parents and teachers of these schools for their cooperation, understanding and sacrifices, thus making this work possible. I wish to appreciate the contribution made to this study by Jane Omolo through her translation of parts of the study proposal in Kiswahili for ease of understanding by the local population. Very special thanks go to M. Duker and H.D. Pieter who helped in the recruitment of the participants, H. Marloes, L

Vassen, E. Driessen and H. Murithi in the pre-test stage, van de Veerdonk, F. Andriessen, A. Schouten, C. Boxtel, M. Ngugi, H. Simila, E. Tromp, M. Buikstra, T.C. Eilooft, S.M.E. Menke, A.L. Tjoe, H. Krebbers, E. Millards. C.P.J.M. Boon, N. Visser(also in pre-test), J. Muasya, A. Josiah, J. Njoki, V. Otieno, R. Magak, R. Agong, J. Magoma, N. Chemeli, Margret, Reuben (Driver), V. Odongo (special assistant), P. Chege (Radiographer) and Christine (Cook) for their valuable contribution and commitment to duty during the operative and evaluation stages of the study.

I am very grateful to William Umbima (post-humously) and Kingsways Business System Limited, Sengani African Inland Church for the support and contribution to this study. I will forever be indebted to Willy, Trijne, Brenda and Bruce Sagala for their support throughout the study period, and for providing me and my family a home in Amersfort from time to time over the period.

Last but not least, I am deeply indebted to my own mother, Jones Minyade, for her wise counsel during my early period of life. She touched all of us in the family, my sisters – E. Muhonja, O. Adisa, A. Iminza and F. Afandi - in special but different ways. In our hearts she remains a source of comfort and inspiration in all we do. Special thanks go to my wife, Serah, for her love, financial and moral support for me and our family. She has played a very crucial and important role in the realization of my dreams to further my education. To my children, I am indebted to their immense support and understanding during the difficult period of my study and their own studies. To Sharon, for his silent support, to Arnold, for being there and worrying about my work as if it was his, and to Linda, for her concerns for me to succeed and for her special contribution in form of two beautiful figures in this thesis.

Finally, I would like to thank all my friends and anyone else whom I have not mentioned and who played a role in assisting me in this research work. There were many people who were directly or indirectly involved and it will be difficult to thank all of them individually. However, I greatly appreciate all the assistance and efforts that each one of them contributed individually or jointly to this research work. I leave them with this saying by T.S.Eliot: 'Where is the wisdom we have lost in knowledge? Where is the knowledge we have lost in information?'

Dankwoord

Ik wil graag iedereen die heeft meegeholpen om dit proefschrift af te ronden bedanken. In de eerste plaats dank ik mijn promotor prof. dr. Cor van Loveren en co-promotor dr. WE van Amerongen voor hun geduld tijdens de werken en moeilijke momenten die dit document had om door te gaan. Voor Evert, uw geduld en motivatie was erg inspirerend. Ik bedank alle sympathisanten van de goed ACTA, met name uit de Peadodontology sectie. Ze zijn erg aardig en behulpzaam als ik had wat tijd doorbrengen bij ACTA. De steun van de NUFFIC, de bedrijven die gaf me de materialen (ESPE en GC), de familie van Sagala in Amersfort en mijn eigen familie die geloofde in mij en me onvoorwaardelijk gesteund tijdens de gehele duur van de studie. Moge God zegene u allen.
