CONTENTS

Chapter 01 Introduction, based on: Ion channels involved in genetic cardiac arrhythmias.
(Koopmann*, Postema*, Bezzina, Wilde - In: Biophysics of ion channels and diseases)....... 9

Part 1: QT-U syndromes

Chapter 02 Accurate electrocardiographic assessment of the QT-interval. Teach the tangent.
(Postema, De Jong, Van der Bilt, Wilde - Heart Rhythm)................................................. 37

Chapter 03 The response of the QT interval to the brief tachycardia provoked by standing.
A bedside test for diagnosing long QT syndrome.
(Viskin, Postema, Bhuiyan, Rosso et al. - J Am Coll Cardiol)............................................. 47

Chapter 04 $I_{Ks}$ modulates the U-wave: insights in a 100 year old enigma.
(Postema*, Ritsema van Eck*, Opthof, Van Herpen et al. - Heart Rhythm)....................... 61

Chapter 05 Founder mutations in the Netherlands. SCN5A 1795insD, the first described overlap syndrome and one of the largest and best characterised families worldwide.
(Postema, Van den Berg, Van Tintelen, Van den Heuvel et al. - Neth Heart J).................... 77

Chapter 06 Linkage and association analyses in an extended kindred with sodium channelopathy identifies a novel locus for cardiac conduction.

Chapter 07 Sodium channelopathies: do we really understand what’s going on?
(Postema, Mosterd, Alders, Wilde - J Cardiovasc Electrophysiol)...................................... 105

Part 2: Brugada syndrome

Chapter 08 Brugada syndrome.
(Postema, Van Dessel, Wilde - In: Clinical cardiovascular genetics)................................. 117

Chapter 09 Drugs and Brugada syndrome patients: review of the literature, recommendations and an up-to-date website (www.brugadadrugs.org).
(Postema, Wolpert, Amin, Probst et al. - Heart Rhythm).................................................... 145

Chapter 10 Slow and discontinuous conduction conspire in Brugada syndrome. A right ventricular mapping and stimulation study.
(Postema, Van Dessel, De Bakker, Dekker et al. - Circ Arrhythm Electrophysiol).............. 161
Chapter 11 Local depolarization abnormalities are the dominant pathophysiological mechanism for the type-1 ECG in Brugada syndrome. A study of electrocardiograms, body surface potential maps and vectorcardiograms during ajmaline provocation.
(Postema, Van Dessel, Kors, Linnenbank et al. - J Am Coll Cardiol) .......................................................... 179

Chapter 12 The pathophysiological mechanism underlying Brugada syndrome. Depolarization versus repolarization.
(Wilde*, Postema*, Di Diego*, Viskin* et al. - J Mol Cell Cardiol) ................................................................. 199

Part 3: Idiopathic ventricular fibrillation

Chapter 13 Idiopathic ventricular fibrillation.
(Postema, Van der Werf, Wilde - In: Clinical Cardiogenetics) ........................................................................... 225

Chapter 14 Haplotype sharing analysis implicates chromosome 7q36 harboring DPP6 in familial idiopathic ventricular fibrillation.
(Alders*, Koopmann*, Christiaans, Postema et al. - Am J Hum Genet) ................................................................. 241

Chapter 15 Founder mutations in the Netherlands. Familial idiopathic ventricular fibrillation and DPP6.
(Postema*, Christiaans*, Hofman, Alders et al. - Neth Heart J) ......................................................................... 257

Part 4: Summary and final remarks

Chapter 16 Summary ....................................................................................................................................... 271

Chapter 17 Samenvatting .................................................................................................................................. 281

Curriculum vitae .................................................................................................................................................. 294
List of publications ............................................................................................................................................. 295
Dankwoord / acknowledgements ....................................................................................................................... 300
