Acknowledgments

With the name of ALLAH, the Beneficent, the Merciful. Countless and humble thanks to Almighty God, who blessed and bestowed me the courage and patience to fulfil this assignment.

Finally the time has arrived. I can appreciate, and acknowledge the support and help of those special people I met and worked with. First of all, I owe my deepest gratitude to my promotor, Sjoerd van der Wal, for his kind support, effort and worthy advices during the accompanied period. This thesis would not have been possible without his brilliant guidance and the highly constructive critical discussions I had with him during the research work. Despite the distance, he always responded to my queries by e-mail, even on weekends. I sincerely appreciate the very kind, friendly and motivating attitude of my co-promotor, The Big Peter, who provided me with an opportunity to work in his very dynamic and international research group. Indeed, highly useful and informative discussions with him always added value to my research work. Sjoerd and Peter, thank you very much for your kind help and valuable contributions to my education and research. It was an honour for me to work under your supervision.

I am very grateful to Prof. W. E. Hennink, Prof. D. W. Grijpma, Prof. J. G. M. Janssen, Prof. C. G. de Koster, Dr. W. Th. Kok, and Dr. A. A. Dias for being members of my promotion committee. The feedback and comments from Hans-Gerd Janssen were very much appreciated.

Definitely, I cannot forget the wonderful time I spent at the University of Amsterdam and in the cosmopolitan Amsterdam. My special thanks go to Wim, a true Amsterdam native, for his expertise, cooperation, and precious suggestions throughout my PhD. Your warm reception in the very early morning of 1st November, 2007 at Schiphol is highly regarded.

I am truly indebted and thankful to my wonderful colleagues of the Analytical-Chemistry Group (former Polymer-Analysis Group) for making the work environment very friendly. To Gabriel, for helping me out with data analysis and understanding MATLAB, whenever I visited your office. To Erwin, for guidance in understanding the art of connecting and disconnecting different HPLC systems and detectors to make suitable combinations. To Peter Pruim, for providing me the opportunity to use the nano-pump, which was very fruitful for me. To Rob, for providing useful tips on SEC/GPC. To Linda, for her hospitality, shukria olivia. To Elena and Dominique, for useful discussions. To Rudy, for proofreading my thesis.
Acknowledgements

and for being very supportive. To Peter verschuren, for pleasant technical discussions to help tackle the difficulties during my research work. To Tom, for his generosity and tremendous amount of cooperation that definitely facilitated my research. To Petra Aarnoutse, for her kind help. My warmest and special thanks go to Aleksandra and Daniela, for their utmost help and for being very caring throughout my stay. Importantly, I cordially thank Rashid for the wonderful time we spent together in Gein and at the University of Amsterdam. Playing tennis, cooking, and roaming around the Gasperplas with you will be a part of my memories. Thanks for helping me in designing the cover of my thesis in photoshop. Your absence was very much felt during the last couple of months of my stay in Amsterdam. I also enjoyed the time I spent with to Stella, Francisco, Filippo, Sonja, Arend, Dini, Xulin Jiang, Hanneke, Ngoc A, Katya, Maria, Jana, Chuchu, and Henrik (the viking). I also thank my students Friso, Rolf, Roy, Merel, and Paul for working with me at different levels of my PhD and for their contributions to this dissertation. I am grateful to Azmatullah Khan Baloch for inviting me frequently for tasty pakoras and tea. I am privileged to have had Hannan Tahir – a very kind, humble and sober person – as my housemate during the last year of my stay. To Sajjad Zahir, thanks for bringing delicious food several times.

I owe sincere and earnest thankfulness to Marianne (from international office), Gerda, Petra Hagen, Maureen, Renate (from HIMS office), and Marijke Duyvendak (from UvA Library) for their indispensable assistance. Great discussions with the skilled Jan van Maarseveen and benign/kind support from Hans Bieraugel (from the synthetic-organic-chemistry group), Jan Geenevasen and Jan Meine (from the NMR department), Louis Hartog (biocatalysis and bio-organic chemistry group), and Marjo Mittelmeijer-Hazeleger (from heterogeneous catalysis and sustainable chemistry) were very much appreciated. I would like to mention Marco Scholten (from Agilent Technologies) for his help in understanding different aspects of the time-of-flight mass spectrometer.

It was a pleasure to collaborate with Janine Jansen and Dirk Grijpma; I always enjoyed my visits to the University of Twente and to have useful discussions with you.

I am thankful for the support of DSM during my research. In particular, I would like to take the opportunity to thank Aylvin for his critical remarks and highly useful suggestions; Ron Peters, Bart Plum, and Tristan Handels for their kind assistance with the polyester-urethane-acrylates project. The knowledge, expertise, and the exceptional support of George Mihov and Guy Draaisma helped me a lot during the analysis of multi-block poly(ester amide)s. I also would like to convey my thanks to Marc Hendriks.
I sincerely acknowledge the financial support for my PhD from the Higher Education Commission (HEC) of Pakistan and Nuffic, The Netherlands. Certainly, the kind and caring responses from Rana Shafiq Ahmad, Muhammad Ashfaq (from HEC), Charlene and Loes (from Nuffic) are highly appreciated.

I am also grateful to my employer “University of Engineering and Technology Lahore” for granting me the study leave to pursue my PhD at the University of Amsterdam. I would like to express my gratitude to my colleagues at the Chemistry Department of UET for their best wishes.

I am thankful to Prof. Robert Langer and Dr. Bozhi Tian (Massachusetts Institute of Technology) for their kindness to provide me the high resolution picture and for the generosity in granting me the permission to use it on the cover of my thesis.

I also acknowledge the support of my friends Shahzad Ahmed, Adnan Tahir, Mian Tariq, Ijaz-ul-Mohsin, Khurram, Muhammad Abu Naeem (Lionel Gomes), and many more, who helped me from the beginning and who made my stay comfortable.

If I forgot anybody, I humbly apologize. Thanks anyway.

Finally, I would like to thank my parents and family members for their prayers, encouragement, and support…..

Abdul Ghaffar
Amsterdam, September 2011
