Disclaimer/Complaints regulations

If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <https://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.

Contents

1	Introduction	9
2	Physiological differences between burnout patients and healthy individuals: blood pressure, heart rate, and cortisol responses	35
3	Work-related stress is associated with reduced parasympathetic activity and reduced HPA axis responsiveness	55
4	Immune function and immune regulation in patients with work-related stress	79
5	Individual and group cognitive-behavioural treatment for work-related stress complaints and sickness absence: A randomised controlled trial	99
6	Investigating the effects of cognitive behavioural treatment on the sympathetic, parasympathetic, and neuroendocrine function: A randomised controlled trial among patients with work-related stress	127
7	Group Stress-Management Training enhances morning cortisol in patients with work-related stress complaints: neuroendocrine and immunological outcomes from a randomised controlled trial	151
8	A longitudinal study on the haemodynamic profile associated with work-related stress: Evidence for phase-specific physiological markers	171
9	Investigating the process of recovery of work-related stress; a study assessing predictors of complaints reduction and work-resumption	193
10	Alexithymia, risk factor or consequence of work-related stress?	211
11	General discussion	225
	Summary	243
	Samenvatting	249
	Dankwoord	257
