“Hearts” by Fleur van Velthoven and Tess van den Biezenaar, 4 years old
Thank You!

The development of this thesis has been as much a surprise for me, as well as for others. A few years after deciding to take on a PhD project, Fokko and I decided to move to Singapore. At that point in time it was not clear if it would be even possible to finish my thesis. However, we prioritized to take the opportunity to work and live abroad. It has been one of the most challenging, but also one of the most enriching experiences in my life so far. I have been very lucky to find a way to continue doing research in the same field in Singapore, which enabled me to finally complete this thesis!

As they believe in the East, you can not complete anything without the help of others: it is always achieved through teamwork. Thus, I would like to use this opportunity to thank the many of you who have played an important role in my life during the process of this thesis. However, I acknowledge there are so many people who have contributed in one way or the other, that it is an impossible task to mention all their names. I apologize to anyone who I do not formally acknowledge.

Firstly, my supervisor, Prof. Dr. Frits Boer. Dear Frits, I want to thank you for your loyalty and support during the whole process of this thesis. It has been great to have you as a supervisor as you were patient, optimistic, respectful and importantly very determined that I had to continue doing research. The ‘breakpoint’ was in the summer of 2009, when we had tea in your garden in Amsterdam. It was that moment that you convinced me to make the decision to finish my PhD. Without your help and optimism I would not have succeeded. Your feedback has always been honest and timely, and you have always replied to my questions in a direct way. I sincerely appreciated that! It has been a pleasure to work with you, most of all because you are such a kind and understanding person. It is a shame that I have not been able to start the child psychiatry training under your supervision due to my commitment in Singapore. Hopefully we will still be able to work together in the future! Thank you for being there for me over these years.

My supervisor in Singapore, Prof. Dr. Michael Meaney. Dear Michael, it has been great meeting you, from the other side of the world! I have learnt so much from your vision and creativity. The way you approach the data is something I really admire, you always ‘see something new’ in it. Your criticisms have been very clear and directive, and you were able to deliver this in a positive and stimulating way. I admire your endless enthusiasm for initiated studies and starting up new research. You are not only a role model of a great scientist, but I found a small salesman in you as well! It has been great to listen to your presentations of the work you have done, and also to your experiences in life such as your passion for skiing, your travel experiences and your family life. I will never forget your phone call to the Netherlands when my father just passed away; your vision on his death, and the way (his) life will continue by raising my children in the best way I can, strengthened me. As you certainly have many commitments, I deeply appreciate your participation as a supervisor for my PhD.

Acknowledgements
My supervisor, Prof. Dr. Miranda Olff. Dear Miranda, it has always been very nice and easy
to work with you! Your experience in research, but also your personal views (I remember
your excitement about my opportunity to go to Singapore) were of great help! Thank you
for your critical feedback and your ideas about publishing. In your feedback your passion for
stress related disorders was always present. As a female, you are one of my role models, as
you seem able to combine your ambitions at work together with a family life at home. I hope
we can keep in contact over the next years and ideally work together in the future!

Dear members of the PhD committee; Prof. Dr. A. de Jongh, Dr. R.J.L. Lindauer, Prof.
Dr. A.H. Schene and Prof. Dr. F.C. Verhulst, thank you for your help in judging this the-
sis on its scientific value. A special thanks to Prof. Dr. Aart Schene. Dear Aart, I was lucky
to do the latter part of my psychiatric training under your supervision. Thank you for en-
couraging to do research during my training in Psychiatry. A special thanks for all your help
in enabling me to finish my training in Psychiatry in Singapore. It was not easy to complete
all the documents that the Singapore Medical Council required, but we succeeded! I hope
it will become more common in the future for residents to do a part of their study abroad.
Thank you for being positive about this.

Dear Prof. Dr. Khare, Prof. Dr. Kua, Prof. Dr. Tze Pin Ng and Prof. Dr. John Wong,
thank you for giving me the opportunity to do research in the Department of Psychological
Medicine at NUH in Singapore. I want to thank you for all your assistance and supervision.
It continues to be a great experience to work with all of you.

Dear Prof. Dr. Seang Mei Saw, thank you for using the interesting data of SCORM and
your assistance and clear feedback on the articles.

Dear Dr. Yiong Huak, thanks for all your statistical assistance and your fast reply to my
statistical questions.

Dear Liang Goh, a special thanks for your input and help with genetics. Without a genetic
expert it would have been impossible for me to complete the genetic studies.

Dear Prof. Dr. Wytske Fokkens, thank you for giving us the opportunity to conduct r-
earch in the Department of ENT medicine and your assistance with co-authorship. Dear
Frederique Tan, it was very nice working with you, although it was way too short!

Dear other co-authors, who I have not yet mentioned: Irene Aartman, Prof. Dr. Yap Seng
Chong, Dr. Calvin Fones, Dr. Daniel Fung, Prof. Dr. Peter Gluckman, Gwee, Dr. Roger Ho, Dr. Hans van Hoolwerff, Jin, Dr. Soo Meng Ko, Dr. Rajeev Kumar, May
Li Lim, Dr. Yen Ling Low, Dr. Anselm Mak, Matthew Niti, Stella Nyunt, Dr. Yoon Phaik Ooi, Dr. Swee Chye Queck, Prof. Dr. Sze Tai Wong, Prof. Dr. Tien Yin Wong
and Dr. Bernadine Woo, thank you all for your input on the articles.

Dear research students, Lies and Mirjam, from the Netherlands, and Anne and Evon in
Singapore, thank you for all your help, assistance and commitment!
Dear members of the Stichting Frijling Prins Fund, thank you for your grant for the
ENT study and for your confidence in me to work on this study.

I also would like to thank all children and parents who participated in all the studies.

Dr. Bas Schreuder. Dear Bas, thank you for giving me the opportunity to do research
during my training, and for suggesting the subject of the first study for my thesis.

Dr. Jochanan Huyser. Dear Jochanan, thank you for your good and clear advice to take
on a PhD project during my early training years! Dear Dr. Therese van Amelsvoort, thank
you for convincing me to continue…

Dear Tilly Citroen, thank you for being my supervisor during my career, this has been very
stimulating for my own personal development.

Dear colleagues from the Department of Psychological Medicine. Although I have
needed time to adjust to a different system, it now feels that I feel settled and have a true
sense of belonging in the department. I am enjoying my time in Singapore, working with
you all. Thank you for being open and helpful to me, as I dropped in as someone ‘strange’
from Holland. I have learnt a lot from the Singaporean way of practicing Psychiatry, it is
definitely an enrichment to learn more about cultural differences.

A special thanks to all members of the Women's Emotional Health Team, it is a
pleasure working with you all! Thanks to Cornelia we were able to explore a new field of
Perinatal Psychiatry in Singapore and I feel very passionate about this. I hope we will be
able to grow this field further. Also a special thanks to Prof. Dr. Khare and Ivy, who have
helped me to develop the anxiety clinic in the National University Hospital, and to Prof. Dr.
John Wong with respect to his help to develop the child service in the hospital.

Dear Dr. Vanessa, I have been very happy with your presence in our department! We have
discussed not only all work related matters, in a way of a real peer supervision, which I have
missed from the Netherlands, but we have also been able to share all personal issues. You
have become a dear friend, as we have shared so many things together over the last few
years. It was really exciting that we could even share our last pregnancies together! A special
thanks for your help with this thesis.

Dear Dr. Cornelia, my other great colleague! Thank you for your friendship, which we have
built up over the years. You have become a close friend, and besides that an inspiring ‘boss’
of the Women's Mental Health Team. I hope we will continue working together for many
years, and continue going to conferences around the world!

Dear members of Dokter Bibber. It was a great idea to start a community of Dutch people
in Singapore who are working in biomedical organizations. We have met regularly on the
‘Dr Bibber borrels’ over the last years. A special thanks to Lenny, founder of Dr Bibber.
Marieke and Cecile, a special thanks for your referrals.
Dear little artists, friends and family of Lotte, Linde and Lucas: Lucas and Hugo Berger, Annabelle Bertina, Tess van den Bichelaer, Charlotte and Beau Craig, Fleur and Eline Deiters, Sam and Roos and Olivier van Druten, Fleur and Milou van Veltboven, Maas Wentink, thank you all for the great decoration of my thesis with all your beautiful drawings. We had such a great afternoon making them. Without your paintings this thesis would definitely be less fun to read!

Dear Heleen, Mariel, Mariken, Marloes and Marlon, my dear supervision (‘intervisie’) friends! We have definitely seen each other too infrequently over the last few years. What started as my being away for a maximum of 2 years, has already reached over 4 years. Nevertheless, we have been able to keep in contact with each other and I am thankful for all your emails and phone calls to keep up to date with your working lives and importantly your personal lives. I am really looking forward to joining ‘the group’ again when I am finally back in the Netherlands!

Dear Janneke Zinkstok, thanks for your practical advices on this thesis. It was nice we could meet in Singapore while you were travelling.

Dear good friends, Anouk, Heleen, Janneke, Mitzy and Monica thanks for your friendship over the years. I miss you!

Dear Annette, Dies and Daphne, thanks for your deep friendship for the last 19 years! We got to know each other from the student association in Groningen. Since then, we have shared so much, all the good things and bad things in life. I cannot imagine a world without you! No wonder that you are my ‘paranimfen’! I am thankful to have you as friends, and it is surprising how easy it is to keep in contact with you while we see each other infrequently. Your support during the sickbed of my father was very special to me. I regret that - due to distance - I have not been able to always be there at precious and sad moments in your lives. However, I still feel that by using phone calls, email and skype we have been able to play an important role in each other’s lives, especially during the difficult times that we all faced over the last few years. Even at distance, I will always be there for you!

Dear Amber and Belle, dear ‘oldest’ friends, we have known each other already since we were 13 years old, from our hockey club in The Hague. Unbelievable how fast time flies, and special that we are still friends! It is funny to see how our lives develop from having our first disco parties at our secondary schools to now starting our own families, waiting until our children go to their first disco parties…. Where will this end? I hope we will always stay in touch. When I see you it feels always as ‘coming home’, as we have known each other for such a long long time! Also your help during the funeral of my father is invaluable to me.

Dear ‘new’ friends from Singapore; Desi, Elsbeth, Emilie, Esther, Gwen, Joep, Juud, Maaike, Marieke, Marielle, Marijke, Mariken, Marlon, Maud, Nicole, Nienke, Nina, Patricia, Ruth, Sigrid, Suzanne, Sytske, Viviane, Wendy and Yvette. Without you here in Singapore, life would not be that interesting as it is now! Thank you all for the great moments, evenings, lunches, dinners, and relaxing activities. Also together with all your part-
ners. We have a great time here together, and although the friendships are relatively shorter in time, we see each other so frequently and intensely that it is interesting to experience how fast many friendships are growing into deeper relations. I am fortunate that not many of you have left since I arrived, as I will find it hard to deal with that! Nicole however, moved to Australia, Marielle, Marlon and Joep back to the Netherlands and Patricia to France… I wished we had more time together! I really appreciate that we are still keeping in touch.

A special thanks to Desi, Emilie, Maud, Nicole, Nina, Suzanne and Syske for the playdates and the help with my children/swimming lessons if I needed to work on my thesis. Also a special thanks to Emilie, who was dedicated to make the photographs for my thesis. The photos do have an extra dimension for me, as they were made by a dear friend instead of someone unknown!

Dear Benthe and Bert and dear Elsbeth and Andrew, we are lucky to have such wonderful sisters and brothers-in-law. Many words are not needed; we know what we feel for each other. It is unfortunate that we do not live close together. Thanks for your friendship and support over the years. As we are all living abroad, a special thanks for the nice times we have spent together in France, the UK, Australia and the Netherlands.

Dear Albert and Netty, I am very grateful that I have such caring and understanding parents-in-law! Thank you for being there for us at all times, especially at difficult situations when we could always count on you. But also for your advice, friendship and for your care for Lotte, Linde and Lucas and your loving relationships with them. Dear Albert, a special thanks to you for your active help with my PhD such as giving me feedback and comments, your help with selecting and communicating with Dutch printers and for sending out my books. I really appreciate that!

Dear Mum and Dad, thank you for your good care during my own life. Doing research I realized how many things might have an influence on the outcome of children. Given that I am doing well, enjoying life, working, having great friends, a very sweet husband and lovely children I can only say: you did a great job! I learnt from you ‘to never give up’, and thanks to this trait I was able to complete my studies and this PhD. Dear Mum, a special thanks also for your help and loving relationships with our children Linde, Lotte and Lucas! It is hard that we live so far from you, especially as you are facing difficult times… Dear Dad, unfortunately the defense of this thesis came just too late for you. You were so proud of this and you had wished you could join the defense. As a retired General Practitioner you were especially interested in this topic. I am so happy that you saw at least the draft of my thesis. I miss you!

Lotte and Linde, my dearest girls, and Lucas, my dearest little son, I am so grateful that you all are here! Your births were the happiest moments in my life. Every day I learn new things from you; the way you look at life, the honest remarks you make, the joyfulness and energy you have. Although some days are tough and packed with taking care of you, there is nothing more important to me than that. You all are so special to me! I hope I will always be able to be there for you, to listen to you, to understand your needs and to follow your own development and give you the best guidance I have.

Acknowledgements
Dear Fokko, my greatest love, although we have been together for more than 17 years, I realized that life with you has never been boring! Probably the way in which we are able to give each other freedom to do and develop our own interests, and to give each other room to follow our own ambitions are strengths in our relationship. I also feel the way in which we talk honestly, not avoiding any firm discussions, brings us more closely. Besides that I have always loved your humor! 😊

Living abroad has even brought us closer. Of course it is a wonderful experience to take on parenthood of our lovely children together! I love you!
