Samenvatting .............................................................................................................. 311
Acknowledgements

Finishing this dissertation feels like a dream come true. Over six years ago, when I packed all my belongings and moved across the Atlantic from Boston to Amsterdam, I could not imagine that, in a few years, I would finish a doctoral dissertation on artists in seventeenth-century Amsterdam whose works I admired in the museums around the world. And even better, I managed to find ways to channel the remnants of my last life of numbers and figures in urban planning and transportation into this new life surrounded by art and found my place in the digital art history scholarship of Netherlandish art. I could have never been able to do any of these without the help of many wonderful teachers, amazing colleagues, dear friends, and caring family. I would love to take this opportunity to express my gratitude to the scores of people who have not only kept me afloat but also helped me thrive in my chosen path.

First of all, I want to thank my supervision team for my doctoral research: Charles van den Heuvel, Julia Noordegraaf, Marten Jan Bok, and Claartje Rasterhoff. People usually frowned when they heard that I had four PhD supervisors as they anticipated conflicts of opinion and too many comments to digest. It was never the case. All of you brought your unique background, expertise, and character into my PhD life, complementing each other in your suggestions and insights. All of you are so supportive and generous with your help. You are an all-star dream team that every student wishes to have.

Charles, thank you for always being there for me. I missed terribly dropping by your office for suggestions and feedback or just to discuss the problems in my research. Despite your busy schedule managing a department and several large projects, you always helped me out with useful insights or connected me to other experts. You gave me the full freedom to explore my path while being very supportive and extremely resourceful which greatly smoothened the process of my research. Julia, thank you for always fixing your eyes on the big picture while being always encouraging and inspiring. Your comments and suggestions are so to the point that I tried to internalise some of your insights into my writing and asked myself ‘what would Julia say in this case?’ You never hesitated to pull your resources to help me and surrounded me with the wonderful team at CREATE since my pre-PhD fellowship time. You and Charles are excellent project leaders that made the Virtual Interiors project a fruitful one. Marten Jan, thank you for bringing me to Amsterdam in the first place and for being such a wonderful supervisor and mentor during my master’s and PhD years. You recognised my potential and guided me into the field when I was just a master’s student, for which I am grateful every single day. I am both thrilled and honoured to be able to follow in your footsteps and delve into the field of socioeconomic art history. Claartje, thank you for all the inspiring and stimulating talks we have had during the past years. I always find myself lingering in what can be described as intellectual euphoria after each of the ‘heated’ debates with your brilliant mind. Your insights and suggestions have given the final shape to this dissertation and I enjoyed every step of the way.

Next to my supervisors, I am lucky to carry out my research as part of a larger project team. I would love to thank my fellow Virtual Interiors project members, Chiara Piccoli, Hugo Huurdeman, Bart Reuvekamp, Saan Rashid, and Gabri van Tussenbroek for being great
Acknowledgements

In particular, Chiara, I enjoy collaborating with you. You have shown me time and time again how to work effectively and how to balance life and work. Hugo, you are my absolute role model for managing complex research projects. My gratitude also goes to Leon van Wissen and Ivan Kисjes at CREATE, who helped us manage our data. I am thankful for my Huygens colleagues and officemates in room 1.12, the (arguably) cosiest room in the Spinhuis with modern adaptations of Rembrandt with an Ajax scarf adorning the wall. I would like to thank Judith Brouwer for managing our lovely office and being such a wonderful officemate. Your laughter and positivity (and love for cats) brightened many of my days even in gloomy Dutch winters. I am also greatly indebted to Moorea Hall-Aquitania, who read and edited all the chapters of this dissertation and provided her endless support and encouragement throughout the journey.

Beyond these immediate circles, a greater academic community at the Huygens Institute, the University of Amsterdam and beyond supported me during these years. I am extremely fortunate to be surrounded by many brilliant scholars in the art history of Netherlandish art who generously lent their hand when I reached out for help. I feel so grateful to have Eric Jan Sluijter accompanying me throughout my research journey, who not only offered much great insight on many drafts of the dissertation and other articles but also spared no effort promoting my research whenever he could. I could only admire the dedication, erudition, and open-mindedness of Eric Jan. I also received much help from Elmer Kolfin and enjoyed our talks very much; Hugo van der Velden without whose staunch support I could not have started this dissertation project and for which I am always grateful. My appreciation further goes to Clé Lesger, Lex Bosman and Maarten Prak who never hesitate to lend me a hand in research and career. I am also grateful for Harm Nijboer, Maarten Hell, and Paul Dijstelberge for sharing their data. Moreover, seminars at the onderzoeksbijeenkomsten (organised by Eric Jan, Judith Noorman, Frans Grizenhout, and only recently, myself) with drinks afterwards and other gatherings among PhDs at the Huygens energised me and helped me keep academic enthusiasm throughout the long journey of researching one topic for four years. It has been a great pleasure to meet too many art historians, curators, and other scholars to name individually, who worked on a broad range of fascinating topics. Not to mention my wonderful teachers and mentors in the United States, Elizabeth Honig, Frima Fox Hofrichter, and Stephanie Dickey, who helped me navigate the broader landscape of Dutch art history across the Atlantic during different phases of my study.

Finally, friends and family have always stayed by my side and hauled me through the years. They spread out across several time zones mostly in North America and Asia and could be there for me 24/7. Even though the pandemic kept us apart for most of my PhD years, we managed to stay close through chats and video calls. I want to thank all of you for your friendship and for being witnesses to each other’s growth. I am also beyond lucky to have my parents who give me unconditional love and support me. 亲爱的爸爸妈妈，谢谢你们一直以来的陪伴与支持，支持我做我想做的事，成为我想成为的人，永远爱你们! Above all, I am most grateful to have my husband Thomas by my side along the way, who has always been the first reader, attentive editor, thoughtful critic, and jaunty cheerleader to all my work. I cannot imagine finishing this dissertation without you. You are truly the best!

DBK    Inventaris van het Archief van de Commissarissen van de Desolate
VOC    Vereenigde Oost-Indische Compagnie

Note on currency:

The Dutch currency, the guilder (ƒ), was divided into 20 stuivers; each stuiver was subdivided into 16 penningen. In addition to guilders, the Flemish pounds (fl) were used occasionally. One pound Flemish equalled six guilders. To make currency figures more easily comprehensible, I have converted everything into guilders divided into 100 cents.
