ACKNOWLEDGEMENTS

Promotors
My heart-felt gratitude goes to Professor Bernard Brabin for his inspiration, support, advice, patience, encouragement, optimism, visionary leadership, everlasting ambition to develop young African scientists, resource mobilisation and hard work, without whom I could not have managed to come this far. I am also thankful to all the staff in the Child and Reproductive Health Group, Liverpool School of Tropical Medicine for all the support they gave me during my visits to Liverpool.

In Malawi
My special thanks to my field supervisor- Dr Peter Kazembe of University of Malawi College of Medicine, Baylor Children’s Clinical Centre of Excellence for his encouragement, motivation and management of the research project. I am also grateful to the management of Montfort Mission Hospital in Nchalo, Chikwawa for housing the research project and Mr Elvis Kapinga-the field supervisor and all the twenty eight community health workers for their time and dedication. Thanks to College of Medicine, Finance and Administration Department for the administration support of the research project. I would also thank the Country Representative, Dr F. Zawaira, WHO Malawi Country Office for her encouragement and allowing me to go on relatively long annual leave.

My sincere gratitude also goes to the following colleagues: Dr Emma Savage, Dr Getrude Kalanda and Mr Edward Senga and Dr Sabin Gies for their contributions and working together.

My family
Unlike the last three academic journeys, this last one was long and sometimes we were losing hope, could not see the light at the end of the tunnel. Thank you for your prayers, encouragement and motivation. In particular, my special thanks to my wife Hilda, children Limbani and Tiyanjane, my mother Ms Efrida Kaputeni and brother Harold.

Financial Support
I am grateful to European Commission Research Directorate (Contract ICA4-CT-2002-10022) for funding my PhD.
