Contents

1 Introduction ............................ 1
  1.1 Educational Context .................. 2
  1.2 R&D at AMSTEL ....................... 13
  1.3 Multiformity of ICT Tools .......... 15
  1.4 Aims and Set-Up of the Study ...... 18
  1.5 Structure of the Thesis .......... 24

2 Classroom Studies 25
  2.1 Introduction .......................... 26
  2.2 Student Work with Real Data about Human Growth .................. 30
  2.3 Computer-Based Investigations of Mathematical Shapes of Real Objects 37
    2.3.1 Image Analysis of Bridges and Hanging Chains .......... 37
    2.3.2 Modeling Shapes of Bridges and Hanging Chains ........ 41
  2.4 Video Analysis of Human Locomotion .......................... 44
    2.4.1 Gait Analysis in the Classroom .................... 45
    2.4.2 Gait Analysis in a Masterclass ................... 51
  2.5 Video-Based Practical Work at Pre-Vocational Secondary School Level 56
  2.6 Spreadsheet-Based Data Handling ................................ 62
    2.6.1 Survival Analysis of Censored Clinical Data by Students ....... 62
    2.6.2 Handling Weather Data ............................. 67
  2.7 Computer-Based Modeling in Quantitative Pharmacology .......... 74
  2.8 Video Analysis and Modeling of Bouncing Balls .................. 83

3 Computer Tools for Cross-Disciplinary Work with Real Data 99
  3.1 Overview of Activity Types .......... 100
    3.1.1 Data Logging ....................... 102
    3.1.2 Control ............................ 103
    3.1.3 Digital Image and Video Analysis .................. 104
    3.1.4 Modeling and Simulation ............. 108
    3.1.5 Animation ........................... 111
  3.2 Digital Image and Video Analysis .................. 114
    3.2.1 Image Analysis of a Hanging Slinky ............... 115
    3.2.2 Perspective Correction Applied in Crime Scene Photography .... 118
    3.2.3 Using High Speed Video to Study Moving Coins ........... 122
  3.3 Modeling .............................. 127
    3.3.1 Modeling Chemical Kinetics Graphically .......... 127
3.3.2 ICT-Supported Study of Acid-Base Titration Curves          136
3.3.3 Modeling of Tidal Movement                                142
3.4 Data Logging, Control, and Video Combined                   150
3.4.1 Gait Analysis via Electromyography                        151
3.4.2 Exploring Standing Vertical Jumps                          153
3.4.3 Measuring the Pupil Light Reflex                          160
3.5 Video Analysis and Modeling Combined                        161
3.5.1 Modeling the Motion of a Yoyo                             162
3.5.2 High Speed Video Analysis of a Falling Shuttlecock         165
3.5.3 Modeling the Decay of Beer Foam in a Glass                 169
3.5.4 Understanding the Motion of a Falling Chain                173
3.5.5 Models of Sprinting                                       178
3.5.6 Modeling Bouncing Gaits                                   187
3.5.7 Exploring the Giant Circle on the High Bar                 194

4 Findings and Conclusions                                       203
4.1 Analysis Framework                                           203
4.2 Aspects of Scientific Inquiry and Authenticity              205
4.2.1 Quantitative Mathematical Modeling Competency             205
4.2.2 Design and Conduct of Experiments, and Basic Data Handling 211
4.2.3 Graph Sense                                               216
4.2.4 Data Sense                                                227
4.2.5 Symbol Sense                                              232
4.2.6 Representational Fluency                                 238
4.2.7 Instructional Design                                      241
4.2.8 Authenticity                                              247
4.3 Aspects of Tool Design                                       250
4.3.1 The Role of ICT in Quantitative Mathematical Modeling     251
4.3.2 ICT-supported Mathematical Representations                261
4.3.3 Tables and Graphs                                         264
4.3.4 Data Manipulation, Processing, and Analysis               274
4.3.5 Video Analysis                                            281
4.3.6 Graphical System Dynamics-Based Modeling                  288
4.4 Concluding Remarks                                           294
4.4.1 Main Outcomes                                             294
4.4.2 Answers to the Driving Questions                          303
4.4.3 Reflection on the Presented and Future Work               307
