Perspectives on an Integrated Computer Learning Environment

Heck, A.J.P.

Citation for published version (APA):
## Contents

1 Introduction ................................. 1
1.1 Educational Context ....................... 2
1.2 R&D at AMTEL ............................. 13
1.3 Multiformity of ICT Tools ................. 15
1.4 Aims and Set-Up of the Study ............. 18
1.5 Structure of the Thesis .................... 24

2 Classroom Studies ......................... 25
2.1 Introduction .............................. 26
2.2 Student Work with Real Data about Human Growth .......... 30
2.3 Computer-Based Investigations of Mathematical Shapes of Real Objects 37
  2.3.1 Image Analysis of Bridges and Hanging Chains .................. 37
  2.3.2 Modeling Shapes of Bridges and Hanging Chains ................. 41
2.4 Video Analysis of Human Locomotion ............ 44
  2.4.1 Gait Analysis in the Classroom ................. 45
  2.4.2 Gait Analysis in a Masterclass ................ 51
2.5 Video-Based Practical Work at Pre-Vocational Secondary School Level 56
2.6 Spreadsheet-Based Data Handling ............. 62
  2.6.1 Survival Analysis of Censored Clinical Data by Students .... 62
  2.6.2 Handling Weather Data ................... 67
2.7 Computer-Based Modeling in Quantitative Pharmacology ........ 74
2.8 Video Analysis and Modeling of Bouncing Balls ............ 83

3 Computer Tools for Cross-Disciplinary Work with Real Data 99
3.1 Overview of Activity Types ................ 100
  3.1.1 Data Logging .......................... 102
  3.1.2 Control ............................... 103
  3.1.3 Digital Image and Video Analysis ............. 104
  3.1.4 Modeling and Simulation ................ 108
  3.1.5 Animation ............................. 111
3.2 Digital Image and Video Analysis ............. 114
  3.2.1 Image Analysis of a Hanging Slinky ............ 115
  3.2.2 Perspective Correction Applied in Crime Scene Photography 118
  3.2.3 Using High Speed Video to Study Moving Coins ............ 122
3.3 Modeling .................................. 127
  3.3.1 Modeling Chemical Kinetics Graphically .......... 127
### 3.3.2 ICT-Supported Study of Acid-Base Titration Curves

- Page 136

### 3.3.3 Modeling of Tidal Movement

- Page 142

### 3.4 Data Logging, Control, and Video Combined

#### 3.4.1 Gait Analysis via Electromyography

- Page 151

#### 3.4.2 Exploring Standing Vertical Jumps

- Page 153

#### 3.4.3 Measuring the Pupil Light Reflex

- Page 160

### 3.5 Video Analysis and Modeling Combined

#### 3.5.1 Modeling the Motion of a Yoyo

- Page 162

#### 3.5.2 High Speed Video Analysis of a Falling Shuttlecock

- Page 165

#### 3.5.3 Modeling the Decay of Beer Foam in a Glass

- Page 169

#### 3.5.4 Understanding the Motion of a Falling Chain

- Page 173

#### 3.5.5 Models of Sprinting

- Page 178

#### 3.5.6 Modeling Bouncing Gaits

- Page 187

#### 3.5.7 Exploring the Giant Circle on the High Bar

- Page 194

### 4 Findings and Conclusions
