Perspectives on an Integrated Computer Learning Environment

Heck, A.J.P.

Citation for published version (APA):
## Contents

1 Introduction
   1.1 Educational Context ........................................... 2
   1.2 R&D at AMSTEL ........................................... 13
   1.3 Multiformity of ICT Tools ........................................ 15
   1.4 Aims and Set-Up of the Study .................................... 18
   1.5 Structure of the Thesis ....................................... 24

2 Classroom Studies
   2.1 Introduction ........................................... 26
   2.2 Student Work with Real Data about Human Growth ................. 30
   2.3 Computer-Based Investigations of Mathematical Shapes of Real Objects
       2.3.1 Image Analysis of Bridges and Hanging Chains ............... 37
       2.3.2 Modeling Shapes of Bridges and Hanging Chains ............... 41
   2.4 Video Analysis of Human Locomotion ................................ 44
       2.4.1 Gait Analysis in the Classroom .............................. 45
       2.4.2 Gait Analysis in a Masterclass .............................. 51
   2.5 Video-Based Practical Work at Pre-Vocational Secondary School Level 56
   2.6 Spreadsheet-Based Data Handling .................................. 62
       2.6.1 Survival Analysis of Censored Clinical Data by Students ... 62
       2.6.2 Handling Weather Data ...................................... 67
   2.7 Computer-Based Modeling in Quantitative Pharmacology ............. 74
   2.8 Video Analysis and Modeling of Bouncing Balls ........................ 83

3 Computer Tools for Cross-Disciplinary Work with Real Data 99
   3.1 Overview of Activity Types ...................................... 100
       3.1.1 Data Logging ........................................... 102
       3.1.2 Control ............................................... 103
       3.1.3 Digital Image and Video Analysis .............................. 104
       3.1.4 Modeling and Simulation ................................... 108
       3.1.5 Animation .............................................. 111
   3.2 Digital Image and Video Analysis .................................. 114
       3.2.1 Image Analysis of a Hanging Slinky ........................... 115
       3.2.2 Perspective Correction Applied in Crime Scene Photography 118
       3.2.3 Using High Speed Video to Study Moving Coins ............... 122
   3.3 Modeling .................................................. 127
       3.3.1 Modeling Chemical Kinetics Graphically ....................... 127

4 Findings and Conclusions

4.1 Analysis Framework                                      203

4.2 Aspects of Scientific Inquiry and Authenticity         205
4.2.1 Quantitative Mathematical Modeling Competency          205
4.2.2 Design and Conduct of Experiments, and Basic Data Handling 211
4.2.3 Graph Sense                                            216
4.2.4 Data Sense                                            227
4.2.5 Symbol Sense                                          232
4.2.6 Representational Fluency                              238
4.2.7 Instructional Design                                  241
4.2.8 Authenticity                                          247

4.3 Aspects of Tool Design                                  250
4.3.1 The Role of ICT in Quantitative Mathematical Modeling 251
4.3.2 ICT-supported Mathematical Representations             261
4.3.3 Tables and Graphs                                     264
4.3.4 Data Manipulation, Processing, and Analysis           274
4.3.5 Video Analysis                                        281
4.3.6 Graphical System Dynamics-Based Modeling              288

4.4 Concluding Remarks                                      294
4.4.1 Main Outcomes                                         294
4.4.2 Answers to the Driving Questions                      303
4.4.3 Reflection on the Presented and Future Work           307
