Many people have given me inspiration, support and feedback while working on this PhD thesis and I want to my express my gratitude to all of them. I’d like to acknowledge the people that have been closely connected with the realization of my PhD: the schools that participated in this research and their students, my colleagues at the University of Amsterdam, the Kohnstamm Institute, Ontdeknet, the Atgentive project, mentors, family and friends.

The start of this project was writing the funding proposal for the national scientific organization of the Netherlands (NWO). Marianne Elshout-Mohr, you were willing to engage in this endeavor with me. Not only were you the main applicant for the proposal that funded my PhD thesis, you were also a great guide in helping me to formalize the direction of my research as well as the organization of my PhD trajectory. I am very grateful for your advice and support.

Peter Sleegers and Carla van Boxtel, thank you for being my supervising team. Together you are a wonderful team, each making your own unique contribution. Your guidance and feedback helped me to develop a fundamental understanding of how to do research in schools and report on this in an appropriate way. Carla, your continuing support and extensive knowledge of collaborative learning greatly helped in the formalization of this thesis. Peter, your incredible ability to structure articles and always find the right way to explain complex matters in an accessible manner contributed greatly to this work. It has been my pleasure to learn from you and I hope that I will be able to work with you in the future.

I also want to express my thanks to all the partners of the Atgentive project. May Liem, thank you for your advice on acquiring the project; I never expected that my first European proposal would actually be funded. Claudia Roda and Thiery Nabeth, thank you for writing this proposal with me. Claudia, I really enjoy working with you. Koen, David and Maurice, the Ontdeknet- Agtentive team, the results in this thesis show that all your efforts were worth it!

Ming Ming Chiu, I am looking forward to our future collaboration searching for structure in the process of self-regulated learning. Roger Azevedo, I really value your work and the great conversations about intelligent tutors for self-regulated learning we had. Bernadette van Hout-Wolters, I greatly appreciated your support and your invitation to the Ozeg meetings. Nienke Moolenaar, thank you for giving my presentation at the AERA. Finally, members of the Ozeg and Hogcog, it has been very valuable discussing with you.

Last but not least, Mam and Dad, thanks for always convincing me that I could do it despite the opinion of others. I hope that I can give the same confidence and support to Sophie and Max to achieve their goals. Koen, we have more idea’s together than we can
possibly ever develop, but let’s continue our work together. Jan, the journey is what matters and I chose to travel with you. Sophie and Max, I will see to it that you develop excellent metacognitive skills, collaboratively!
