The epidemiology of HPV and HIV among high-risk women and steady couples in Kigali, Rwanda
This thesis was prepared at the Departement of Global Health, Academic Medical Center, University of Amsterdam and the Amsterdam Institute for Global Health and Development, the Netherlands.

Copyright © 2011, Nienke J Veldhuijzen, Amsterdam, the Netherlands. No part of this thesis may be reproduced, stored, or transmitted in any form or by any means, without prior permission of the author.

The study among the high risk women cohort study described in this thesis was financially supported by the European and Developing Countries Clinical Trials Partnership (EDCTP) through a project entitled: “Preparing for Phase III vaginal microbicide trials in Rwanda and Kenya: Preparedness studies, capacity building, and strengthening of medical referral systems” (CT_05_33070_001). EDCTP cannot accept any responsibility for information or views expressed herein. Furthermore, the research was supported by the International Partnership for Microbicides (IPM), Inc. and by the Centers for Disease Control (CDC). The study among heterosexual couples received funding from the same EDCTP grant and additional funding from the Flemish Interuniversity Council (VLIR-UOS).

The cover was adapted from an advertisement poster of Cafe de Maraba. (Copyright © RWASHOSSCCO S.A.R.I.). Approval was obtained from the Board of RWASHOSSCCO. In Rwanda, coffee is one of the most important agricultural crops. RWASHOSSCCO (Rwanda Small Holder Specialty Coffee Company) is a co-op-owned firm helping its members in the process of coffee certification of origin and of quality, writing of business plans, application for loans in local and foreign financial institutions and facilitating export of products. Cafe de Maraba is one of its roasted coffee beans – and the author’s favorite Rwandan coffee. The poster represents a personal memory of the author to the time she spent in Rwanda and does not represent a Rwandan HIV and/or HPV infected woman.

Cover design by Martijn van Graafeiland.
