Acknowledgment
Since I came to the Netherlands, I have worked with a great number of people. The research project described in this thesis would not have been possible without their support. It is a pleasure to convey my gratitude to them all in my humble acknowledgment.

First of all, I would like to express my deepest sense of gratitude to my supervisors Prof. Dr. Arie Hasman, Dr. Nicolette F. de Keizer and Dr. Ronald Cornet for their patient guidance, encouragement and excellent advice throughout this research. Your involvement with science has triggered and nourished my academic maturity that I will benefit from, for a long time to come. Dear Arie, I gratefully thank you for your constructive comments and your valuable assistance on this thesis. I will never forget the days that we sat together, ate together and listened to stories about different cultures. Dear Nicolette, you always read what I wrote within a couple of days and offered thoughtful opinions. Your ability in reading and reviewing articles was amazing. You were always supportive and generously helped me. It was great for me to have such an opportunity to benefit from your excellent knowledge and invaluable comments. Dear Ronald, your knowledge exceptionally inspires and enriches my growth as a scientist. By asking questions you encouraged me to think about every issue raised during each study. You teach me how to think and how to solve the research problems. Thank you for the time you spent for answering my questions.

Dear Nicolette and Ronald I will never forget the beautiful events that you made for us when you invited us to your homes. I am grateful to all of you and hope to keep up our collaboration in the future.

I appreciate the members of doctorate committee Prof. dr. J. van der Lei, Prof. dr. J.H.M. Schonk, Prof. dr. P.J.M. Bakker, Prof. dr. M. W. Hollmann, Dr. W.A. van Klei for their effort in reading and judgment of my thesis.

I would like to express my gratitude to my scholarship sponsor from the Iranian Ministry of Health and Medical Education for financing my project. I am thankful to Dr. Abdollahi, Dr. Naffisi, Dr. Saeid Tehrani, Dr. Okhovati, Dr. Haghdoost, Dr. Mosavi Ayatollahi and Mr. Talebian for their valuable assistance.

I was lucky to get the opportunity to work with Niels Peek. I learned many things from him and I am indebted to him for his fruitful collaboration and valuable advice in my research.

I am grateful to members of the working group “minimal dataset for preoperative assessment” of the Netherlands’ society of anesthesiologists for defining the core preoperative assessment dataset: Jilles Bijker, Cor Kalkman, Peter Houweling, Teus Kappen, Wilton van Klei, Aart Leyssius, Lex Pfaff, Peter Rosseel, Peter Schutte, Mark Simon, Loes Snel, and Johannes Zwijsen. I am especially thankful to Wilton van Klei and
Peter Houweling for offering thoughtful opinions. Wilton I acknowledge you for your precious time to read my paper and your critical comments about it.

My sincere thanks to Ameen Abu-Hanna for his help and guidance. I greatly benefited from his advice and his valuable experience.

I would also like to thank all my colleagues in department of medical informatics. I benefited from their assistance and their comments during the research meetings. They helped me to learn the Dutch language by encouraging and speaking to me. I appreciate the help and assistance of Dr. Saied Eslami and Dr. Ferishta Bakhshi-Raiez. I would like to thank my paranymphs Sabine van der Veer and Airin Simon for their help and support.

Finally, I wish to express my love and gratitude to my beloved husband and my little angel Ava. Without the efforts of my husband, this book would likely not have been completed. His support was far beyond duty of a husband. I am greatly indebted to him. He took every responsibility for our life here and in the last months of my PhD he donated most of his time to take care of our beautiful daughter while I was busy. I wouldn’t have been able to obtain this degree without his help. The birth of our daughter was the most beautiful event in our life. I will never forget the moment when my husband I together put the tiny finger of our daughter on the mouse pad of the laptop to approve submission of our papers. She brought fortune in our life and all papers that she submitted for us were accepted. She is the origin of my happiness and pleasure.

I pay my respect and love to my parents and all other family members for their love. It has been a desire for my mother to see my doctorate ceremony. I am glad that I could achieve this degree to make her happy. Thanks to my sisters and my brother for their support and lovely welcome when we went to Iran and thanks for preparing with love all things that we wanted to bring to The Netherlands. I would also like to thank my mother and my brothers in-law and their wives for their support and all great events that they made for us when we were in Iran.
