Vertical relations in cartel theory: managerial incentives, buyer groups & antitrust damages

Han, M.A.

Citation for published version (APA):
Background material to this dissertation is available at carteltheory.com. You can find my research and papers in their most updated form, as well as media files on cartels, such as a Netherlands Competition Authority (NMa) film on leniency programs; the trailer of cartel movie The Informant featuring Matt Damon; and undercover FBI footage of the Lysine Cartel’s secret hotel meetings (Lysine Tapes).

Managerial Incentives, Buyer Groups & Antitrust Damages

Martijn A. Han

Martijn A. Han (1983) holds an MSc in Econometrics & Mathematical Economics (2007, “with distinction”) from the London School of Economics & Political Science. He also obtained an BSc in Econometrics (2003, “cum laude”), an MSc in Medicine (2005), and a propaedeutics in Cultural studies (2009) from the University of Amsterdam.

Martijn’s research is on the economics of competition, with a focus on cartels. This dissertation was written from 2007 - 2011 at the Amsterdam Center for Law & Economics and during a research visit at the Taubate School of Economics. Chapter 2 was awarded the 2011 Robert F. Ullman Prize for the best paper in antitrust economics at the annual International Industrial Organization Conference (IGO) organized in Boston, April 2011.

In the summers of 2007 and 2009, Martijn worked as an Assistant Economist at the U.K. Competition Commission and as an Economic Summer Intern at the U.K. Office of Fair Trading. He also assisted in several private economic consultancy projects.

In addition to his theoretical interest in competition economics, Martijn is an active market competitor himself. He co-created a small t-shirt label, runs an online shop in lamps, and recently founded a GMO fast-food preparation agency. Martijn enjoys applying economic theory to his ventures, which, in turn, serve as an inspiring source for academic research.

The Amsterdam Center for Law & Economics is a joint initiative of the Amsterdam School of Economics and the Law School at the University of Amsterdam. The objective of the ACEL is to promote research in the fields at the interface of law and economics.
