Pruritus (itch) is a burdensome and enigmatic symptom in a range of cholestatic liver diseases. Chronic pruritus may lead to severe sleep deprivation, depression and even suicidality. Because the underlying mechanism is unknown, treatment options are limited. This thesis addresses the potential role of the enzyme autotaxin in the pathophysiology of cholestatic pruritus. New treatment options are explored, by both experimental and clinical studies.

Financial support:
The work presented in this thesis was supported by a ZonMW grant to Ronald Oude Elferink (TOP 40-00812-98-10054), the Wellcome Trust and Biomedical Research Centre at Imperial College London to Catherine Williamson, research grants "Primary sclerosing cholangitis" from the Deutsche Crohn-Colitis-Vereinigung and the Norwegian Primary Sclerosing Cholangitis Centre to Ulrich Beuers, Deutsche Forschungsgemeinschaft (KR4391/1-1) to Andreas Kremer, research grants "Gastrostart" from the Nederlandse Vereniging voor Gastroenterologie (NVGE), "Pitch your Project" from Dr. Falk Pharma Benelux and the Academic Medical Centre Foundation, awarded to Ruth Bolier and Ulrich Beuers.

Publication of this thesis was supported by the Academic Medical Centre and the Nederlandse Vereniging voor Hepatologie (NVH).

THE ROLE OF AUTOTAXIN IN CHOLESTATIC PRURITUS

ACADEMISCH PROEFSCHRIFT

Ter verkrijging van de graad van doctor aan de Universiteit van Amsterdam op gezag van de Rector Magnificus prof. dr. ir. K.I.J. Maex ten overstaan van een door het College voor Promoties ingestelde commissie, in het openbaar te verdedigen in de Agnietenkapel op dinsdag 4 juli 2017, te 10.00 uur

Anne Ruth Bolier
geboren te Rosmalen
TABLE OF CONTENTS

Chapter 1 Introduction & outline of this thesis 7
Published in Clinics in Liver Disease 2013 and Hepatology 2014

Chapter 2 Autotaxin activity has a high accuracy to diagnose intrahepatic cholestasis of pregnancy 29
Journal of Hepatology 2014

Chapter 3 Enteroendocrine cells are a potential source of serum autotaxin in men 49
Biochimica et Biophysica Acta 2016

Chapter 4 Lysophosphatidic acid induces chronic itch in mice when produced locally in the skin 69
Submitted

Chapter 5 Feedback repression of autotaxin in in vitro mouse but not human skin fibroblasts 89
Submitted

Chapter 6 Steroid binding to Autotaxin links bile salts and lysophosphatidic acid signaling 107
Nature communications 2016

Chapter 7 Fibrates for the treatment of cholestatic itch (FITCH); study protocol for a double-blind randomized placebo-controlled clinical trial 137
Trials 2017

Chapter 8 Summarizing discussion and future perspectives 153

Appendices Nederlandse samenvatting 169
List of abbreviations 173
Dankwoord 176
PhD portfolio 177
