Fall Risk Prediction and Validation in Older Adults

Leveraging Electronic Health Records with Machine Learning

ACADEMISCH PROEFSCHRIFT

ter verkrijging van de graad van doctor
aan de Universiteit van Amsterdam
op gezag van de Rector Magnificus
prof. dr. ir. P.P.C.C. Verbeek
ten overstaan van een door het College voor Promoties ingestelde commissie,
in het openbaar te verdedigen in de Agnietenkapel
op donderdag 9 november 2023, te 16:00 uur

door

Noman Dormosh

geboren te Jeddah

Faculteit der Geneeskunde

In loving memory of my dear father, Mohammad, And to my beloved mother, Boshra, my cherished wife Heba, and our children Boshra, Mohammad, Omar, Huda, Hamza, and Mahmoud.

This thesis is dedicated to you, with heartfelt gratitude and endless love.

Contents

Chapter 1	General introduction	1
Chapter 2	A systematic review of fall prediction models for community-dwelling older adults: comparison between models based on research cohorts and models based on routinely-collected data	13
Chapter 3	Development and internal validation of a risk prediction model for falls among older people using primary care electronic health records	51
Chapter 4	External validation of a prediction model for falls in older people based on electronic health records in primary care	69
Chapter 5	Development and internal validation of a prediction model for falls using electronic health records in a hospital setting	85
Chapter 6	Impact of altering data granularity levels on predictive modelling: a case study of fall risk prediction in older persons	103
Chapter 7	Predicting future falls in older people using Natural Language Processing of general practitioners' clinical notes	111
Chapter 8	Topic evolution over time before falls through Natural Language Processing of general practitioners' clinical notes	131
Chapter 9	Seniors empowered via big data to joint-manage their medication-related risk of falling in primary care: The SNOWDROP project	151
Chapter 10	General discussion	163
	Appendices	185
	Summary	186
	Samenvatting (Dutch summary)	190
	Portfolio	194
	Acknowledgments	196
