Contents

1 Introduction ........................................... 1
   1.1 X-ray binaries ................................... 1
   1.2 X-ray observations of X-ray binaries .......... 3
      1.2.1 Timing analysis ............................... 3
      1.2.2 Spectral analysis ........................... 6
      1.2.3 Imaging ..................................... 7
   1.3 X-ray binaries: classification and X-ray states . 8
      1.3.1 Neutron star X-ray binaries ................. 8
      1.3.2 Black hole X-ray binaries .................. 10
   1.4 Relativistic ejections ............................ 12
   1.5 Outline of this thesis ............................ 14

2 A transient low-frequency QPO from the black hole binary GRS 1915+105 .... 17
   2.1 Introduction ..................................... 18
   2.2 Observations and data analysis .................... 20
   2.3 Results ........................................... 23
      2.3.1 Phase lags .................................. 28
   2.4 Discussion and conclusions ........................ 28
      2.4.1 QPOs identification .......................... 30
      2.4.2 Phase lags .................................. 31
      2.4.3 GRS 1915+105 as a “normal” source .......... 32
      2.4.4 X-ray/radio association ........................ 33
   2.5 Appendix: fit results and phase lags ............ 33

3 Linking jet emission and X-ray properties in the peculiar neutron star X-ray binary Circinus X-1 .... 41
Contents

3.1 Introduction ......................................... 42
  3.1.1 Cir X-1 ........................................... 44
3.2 Observations and data analysis ................................. 45
  3.2.1 X-ray data ......................................... 45
  3.2.2 Radio data .......................................... 49
3.3 Results and interpretation ................................... 49
  3.3.1 Light curves and evolution in the hardness-intensity diagrams 49
  3.3.2 Identification of Z-source features ......................... 50
  3.3.3 Correlated X-ray/radio behaviour ......................... 57
3.4 Discussion ........................................... 60
3.5 Conclusions .......................................... 65

4 A parsec scale X-ray extended structure from the X-ray binary Circinus X-1 67
  4.1 Introduction ........................................... 68
  4.2 Observation and data analysis ............................... 69
    4.2.1 X-ray jets ........................................ 70
    4.2.2 Comparison with previously detected X-ray extended structure and the radio jet 72
  4.3 Discussion and conclusions ................................ 74

5 Discovery of a broad iron line in the black-hole candidate Swift J1753.5−0127, and the disk emission in the low/hard state revisited 77
  5.1 Introduction ........................................... 78
  5.2 Data reduction ........................................ 79
    5.2.1 XMM-Newton ....................................... 79
    5.2.2 RXTE ................................................ 82
  5.3 Data analysis and results .................................. 82
    5.3.1 General fit procedure ................................ 82
    5.3.2 A power-law model .................................. 83
    5.3.3 Cut-off power-law model .............................. 84
    5.3.4 Broken power-law model .............................. 84
    5.3.5 Comptonization model ............................... 86
    5.3.6 Reflection models: PEXRAV and PEXRIV .............. 86
6 Investigating the disc-jet coupling in accreting compact objects using the black hole candidate Swift J1753.5-0127

6.1 Introduction
6.1.1 Swift J1753.5-0127
6.2 Observations and data analysis
6.2.1 X-ray data
6.2.2 Radio data
6.2.3 OIR/ultraviolet data
6.3 Results
6.3.1 Radio/X-ray correlation
6.3.2 OIR/X-ray correlation
6.3.3 Spectral energy distributions
6.4 Discussion
6.4.1 The scatter of the radio/X-ray correlation
6.4.2 Swift J1753.5-0127: a peculiar source
6.5 Conclusions
6.6 Appendix: radio and OIR observations

7 On the nature of the “radio quiet” black hole binaries

7.1 Introduction
7.2 The hard state jet power
7.3 BHC properties and jet power
7.3.1 Binary parameters
7.3.2 Properties of the outburst
7.4 The scatter of the radio/X-ray correlation: a jet-toy model
7.5 Discussion
7.6 Conclusions
