# Including the voice of children Towards patient-centered care

1. No scientific pediatric research should be done without the engagement of children in the design, data collection or interpretation phase of the study.  
*This thesis*
2. The main reason why pediatric patients are not yet sufficiently involved in health care and research is because clinicians are afraid to let go of control of the decision-making process. *This thesis*
3. Worldwide standardization of PROM administration is necessary. *This thesis*
4. PROMIS promises a reduction in the burden of completing PROMs. However, PROMIS is not (yet) ready for use in pediatric clinical practice.  
*This thesis*
5. The use of an implementation science framework is necessary when implementing PROMs in clinical practice. *This thesis*
6. PREMs should only be used if there is a plan on how the data can be used for quality improvement to provide patient-centered care. *This thesis*
7. Exploring new places and experiences serves as a catalyst for personal growth.
8. Finishing the final year of your thesis, it can be done without coffee and sleep.
9. Most people are other people. *Oscar Wilde*
10. If everyone is moving forward together, then success takes care of itself.  
*Henry Ford*
11. Learning without implementation is arrogance. *Richie Norton*
