## Table of Contents

**Chapter 1**  General introduction and outline of the thesis  

**Chapter 2**  Early invasive versus selectively invasive management for acute coronary syndromes.  

*New England Journal of Medicine, September 2005*  

**Chapter 3**  Long-term outcome after an early invasive versus selective invasive treatment strategy in patients with non-ST-elevation acute coronary syndrome and elevated cardiac troponin T (the ICTUS trial): a follow-up study.  

*The Lancet, March 2007*  

**Chapter 4**  Vroeg invasieve behandelstrategie niet beter dan selectief invasieve bij patiënten met een acuut coronair syndroom zonder ST-elevatie en met een verhoogde troponinewaarde: langetermijnresultaten van de ICTUS-studie.  

*Nederlands Tijdschrift voor Geneeskunde, februari 2008*  

**Chapter 5**  Diverging associations of an intended early invasive strategy compared with actual revascularization, and outcome in patients with non-ST-segment elevation acute coronary syndrome: the problem of treatment selection bias.  

*European Heart Journal, March 2009*  

**Chapter 6**  ST-segment deviation on the admission electrocardiogram, treatment strategy, and outcome in non-ST-elevation acute coronary syndromes: A substudy of the Invasive versus Conservative Treatment in Unstable coronary Syndromes (ICTUS) Trial.  

*Journal of Electrocardiology, 2007*

Chapter 8  Cystatin C for enhancement of risk stratification in non-ST elevation acute coronary syndrome patients with an increased troponin T. *Clinical Chemistry, June 2009*

Chapter 9  Early invasive vs conservative treatment strategies in women and men with unstable angina and non-ST-segment elevation myocardial infarction: a meta-analysis. *JAMA, July 2008*

Chapter 10  Summary and findings of the thesis
Samenvatting en conclusie van het proefschrift
