Contents

Chapter 1 General introduction and outline of the thesis 9

Part 1 Clinical outcome following primary angioplasty in advanced coronary artery disease 17
Chapter 2 Primary percutaneous coronary intervention for patients with acute ST-elevation myocardial infarction with and without diabetes mellitus Heart 2006;92:117-118 19
Chapter 3 Time from coronary artery bypass surgery does not affect outcome in patients treated with primary angioplasty for acute saphenous vein graft occlusion Heart 2007;93:381-382 31

Part 2 The impact of multivessel disease and chronic total occlusions in STEMI patients treated with primary PCI 39
Chapter 4 Long-term impact of multivessel disease on cause-specific mortality after ST-elevation myocardial infarction treated with reperfusion therapy Heart 2006;92:1760-1763 41
Chapter 5 Impact of multivessel coronary disease on long-term mortality in patients with ST-elevation myocardial infarction is due to the presence of a chronic total occlusion Am J Cardiol 2006;98:1165-1169 51
Chapter 7 Impact of multivessel disease with or without a concurrent chronic total occlusion on one-year mortality in patients treated with primary percutaneous coronary intervention for cardiogenic shock. Should we pursue complete revascularization? Am J Cardiol 2010;105:955-959 77
Chapter 8 Prevalence and impact of a chronic total occlusion in a non-infarct related artery on long-term mortality in diabetic patients with ST-elevation myocardial infarction Submitted 89
Part 3  Towards recanalization of a chronic total coronary occlusion following primary angioplasty 101
Chapter 9  Relation of multivessel primary percutaneous coronary intervention for ST-elevation myocardial infarction to outcome and/or non-infarct artery intervention of a chronic total occlusion 103
Am J Cardiol 2010;105:902-903
Chapter 10  Impact of recanalization of a chronic total occlusion on left ventricular function in patients after primary percutaneous coronary intervention for ST-elevation myocardial infarction: Rationale and design of EXPLORE – a prospective, randomized, multicenter trial 107
Submitted
Chapter 11  Summary, future perspectives and concluding remarks 119
Chapter 12  Nederlandse samenvatting 125
