You will be contacted as soon as possible.

Table of Contents

1	Motivation and research objectives	1
1.1	Distributed applications: common patterns and characteristics	2
1.2	Infrastructures for scientific computing	8
1.3	Higher-level middleware systems	9
1.4	User requirements	13
1.5	The research objectives and roadmap	15
2	Dynamics of large computing grids	19
2.1	EGEE – world’s largest computing and data Grid	19
2.2	Grid as an infrastructure	22
2.3	Grid as a task processing system	27
2.4	Summary	39
3	Analysis and modeling of task processing with late binding on the Grid	41
3.1	Introduction	41
3.2	Task processing model	42
3.3	Distribution of job queuing time	44
3.4	Simulation of task processing models	48
3.5	Summary	57
4	Development of the User-level Overlay	59
4.1	Vision	60
4.2	Functional breakdown and architecture	62
4.3	DIANE and Ganga software packages	63
4.4	Operation of the User-level Overlay	64
4.5	The DIANE task coordination framework	66
4.6	The Ganga resource access API and user interface	73

4.7	Heuristic resource selection	80
4.8	Adaptive workload balancing	85
4.9	Summary	89
5	User-level Overlay in action	91
5.1	Monte Carlo simulation with Geant4 toolkit	92
5.2	Workflows for medical imaging simulations	99
5.3	Data processing for ATLAS and LHC <i>b</i> experiments	102
5.4	Massive molecular docking for Avian Flu	103
5.5	Other examples of using DIANE/Ganga overlay	105
5.6	Summary	106
6	Capability computing case study: ITU broadcasting planning	109
6.1	Introduction	109
6.2	Broadcasting planning process	110
6.3	Compatibility analysis	111
6.4	Implementation of grid-based analysis system for the RRC06	113
6.5	Analysis of task processing	115
6.6	Summary	120
7	Capacity computing case study: LatticeQCD simulation	121
7.1	Introduction	121
7.2	Problem to be solved	122
7.3	Simulation model	123
7.4	Implementation and operation of the simulation system	125
7.5	Task scheduling and prioritization	130
7.6	Analysis of adaptive resource selection	137
7.7	Exploiting low-level parallelism for finer lattices	139
7.8	Summary	140
8	Conclusions and future work	143
8.1	Grid dynamics and its consequences for task processing	143
8.2	Contributions of this work	144
8.3	Open issues	146
8.4	Future work	147
8.5	Postscriptum	148
	Bibliography	164
	Summary	165
	Nederlandse samenvatting	167
	Streszczenie po polsku	169
	Publications	171

Acknowledgments	175
Index	177
