van den Broek, F. J. C. (2010). The role of endoscopic imaging for an improved diagnosis of colorectal neoplasia
# Table of contents

Introduction and outline of the thesis  9

## Part I  Critical appraisal of research in endoscopic imaging

**Chapter 1**  19
Review article: New developments in colonic imaging

**Chapter 2**  35
Systematic review of narrow-band imaging for the detection and differentiation of neoplastic and non-neoplastic lesions in the colon

**Chapter 3**  57
Valid and efficient study designs for the evaluation of new colonoscopic techniques: clinical and statistical considerations

## Part II  Role of endoscopic imaging in diagnosis of colonic polyps

**Chapter 4**  83
Clinical evaluation of endoscopic tri-modal imaging for the detection and differentiation of colonic polyps

**Chapter 5**  101
Combining autofluorescence imaging and narrow-band imaging for the differentiation of adenomas from non-neoplastic colonic polyps among experienced and non-experienced endoscopists

**Chapter 6**  119
Hyperplastic polyposis syndrome: a pilot study for the differentiation of polyps by using high-resolution endoscopy, autofluorescence imaging, and narrow-band imaging

**Chapter 7**  145
Narrow-band imaging improves the detection of polyps in patients with hyperplastic polyposis syndrome: a randomized study comparing narrow-band imaging versus high-resolution endoscopy
# Part III  Role of endoscopic imaging in surveillance of ulcerative colitis

## Chapter 8
Random biopsies taken during colonoscopic surveillance of patients with long-standing ulcerative colitis: low yield and absence of clinical consequences

## Chapter 9
Narrow-band imaging compared with conventional colonoscopy for the detection of dysplasia in patients with longstanding ulcerative colitis

## Chapter 10
Endoscopic tri-modal imaging for surveillance in ulcerative colitis: Randomized comparison of high-resolution endoscopy and autofluorescence imaging for neoplasia detection; and evaluation of narrow-band imaging for classification of lesions

## Chapter 11
Narrow-band imaging versus high definition endoscopy for the diagnosis of neoplasia in ulcerative colitis

## Chapter 12
Pilot study of probe-based confocal laser endomicroscopy during colonoscopic surveillance of patients with longstanding ulcerative colitis

## Summary and future perspective
