#### **General rights**

It is not permitted to download or to forward/distribute the text or part of it without the consent of the author(s) and/or copyright holder(s), other than for strictly personal, individual use, unless the work is under an open content license (like Creative Commons).

#### **Disclaimer/Complaints regulations**

If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <https://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.

## Acknowledgements

Tom van Engers, my promoter, has been the instigator of this thesis. Without his encouragement, I would not have embarked upon this project. Also, he has worked hard to ensure that I kept looking beyond the borders of this project. Thanks, Tom.

Radboud Winkels, my co-promoter, has been my guide and sparring partner for this project. Without his assistance, many problems, big and small, would have taken a lot longer to get solved. Thanks, Radboud.

I would also like to thank four students who have contributed to my research as part of their own courses:

Marieke Franssen, for making an inventory of the different language patterns that are used for obligations and permissions;

Gijs Kruitbosch, for his work on programming the knowledge-based classifier for sentences in legal texts;

David de Bos, for running the first experiments with the knowledge-based classifier;

Kai Krabben, for running the experiments with the machine-learning classifier.
