## Acknowledgements

Part One: Mobilities, Borders, and Airports

Chapter 1. Mobilities and borders. Regulating movement in a mobile world

- Introduction ........................................................................................................ 17
- I) Mobilities and borders: theoretical starting points ........................................... 19
  - Mobilities studies and the emergence of the ‘politics of mobility’ ..................... 19
  - Border studies and the changing role of borders in a mobile world ................. 23
- II) Introducing the mobilities regime .................................................................. 27
- III) Outline of the thesis ....................................................................................... 31

Chapter 2. The airport as a method. Four suggestions on how to trace a mobilities regime

- Introduction: Studying transfer points ................................................................. 35
- I) Four points of departure for tracing mobilities regimes .................................... 37
  - 1. The airport is a node and a border ................................................................. 37
  - 2. The airport is a constellation of different actors ............................................. 43
  - 3. The airport is linked and grounded ................................................................. 47
  - 4. The airport is a space containing different kinds of mobile subjects ............... 52
- II) Access, barriers, and detours .......................................................................... 56

Part Two: Drug Smuggling at Schiphol Airport

Chapter 3. Securitizing ‘risk flights’. Drug smuggler profiles, body searches, and the arrival of passengers from the Caribbean at Schiphol Airport

- Introduction ........................................................................................................ 63
- I) Technologies of classification: swallower criteria and digital profiling ............. 69
  - Profiling using swallower criteria ..................................................................... 69
  - Digital profiling using passenger data .............................................................. 74
- II) Making drugs visible: physical and virtual body searches ............................... 77
  - A brief history of physical body searches by Customs ....................................... 77
  - Virtual body searches ....................................................................................... 79
Chapter 4. OK to board? Selective immobilization and pre-emption in an anti-drug-smuggling mobilities regime

Introduction .................................................................................................................... 89
I) Public–private collaboration in regulating mobilities ............................................................ 90
   Pre-flight checks and the black list: the different stakes of the state, travellers, and airlines .................................................................................................................................. 91
II) Relocating regulatory practices in space and time ................................................................. 96
   Relocation of screening: pre-flight checks, the black list, officials, and scanners .......... 97
   The boundaries of relocating procedures ........................................................................ 100
III) Anti-drug-smuggling measures as a mobilities regime of selective immobilization .... 101
IV) Conclusions .................................................................................................................. 104

Part Three: Labour Migration at Soekarno-Hatta Airport

Chapter 5. Protecting ‘foreign revenue heroes’. Terminal 4 and the arrival of returning migrant workers at Soekarno-Hatta Airport

Introduction .................................................................................................................. 111
I) Technologies to regulate migrant mobilities ...................................................................... 114
   Arrivals: technologies of classification in Soekarno-Hatta international terminal ....... 114
   Sitting, queuing, and waiting: regulating movement at the level of the body .............. 119
   Regulatory technologies inside the special migrant building ...................................... 122
II) The production of safety ............................................................................................... 127
   Producing good care: transparency, efficiency, and safety in the migrant terminal .... 127
   Renegotiating safety en route: the journey to the home villages ................................. 130
III) Conclusions .................................................................................................................. 134

Chapter 6. Corridors into the countryside. Encapsulation and the expansion of a government-controlled migrant mobilities regime

Introduction .................................................................................................................. 139
I) The circuit of labour migration from Indonesia: regulating, controlling, and protecting migrant mobilities ........................................................................................................ 140
Department: gender, debt, and control over mobility .................................................. 141
Working abroad: mobility and incarceration in the household ........................................ 146
Going home: departure and transit .............................................................................. 147
II) Expansion of government control over the return journey ........................................ 148
   Extending the regulation of migrant mobilities: from the airport to the home village 149
   Unpacking the government monopoly .................................................................... 150
   Lucrative journeys: the business of managing migrant mobilities ......................... 155
III) The migrant return process as a mobilities regime of encapsulation .................. 158
IV) Conclusions ............................................................................................................ 161

Conclusions

Chapter 7. Mapping contemporary mobilities regimes
   Introduction ............................................................................................................. 167
I) Four characteristics of mobilities regimes .............................................................. 170
   1. Each mobilities regime has a specific mode of regulation in which the enabling
      and restricting of mobilities work in tandem ...................................................... 170
   2. Mobilities regimes are constellations of state and non-state actors .................... 174
   3. Mobilities regimes have extended spatial and temporal contours ..................... 176
   4. Mobilities regimes are on the margins of legitimacy ......................................... 179
II) Mobilities regimes: a research agenda ................................................................. 182

Appendix 1. Methodological notes .............................................................................. 185

Bibliography .............................................................................................................. 191

Summary ..................................................................................................................... 213

Samenvatting .............................................................................................................. 221
