#### **Disclaimer/Complaints regulations**

If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <https://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.

## LIST OF FIGURES

---

Figure 1	The levels of representation and types of stored knowledge in the BiPhon model.	7
Figure 2	Three possible interrelations between F2 and the size of the vowel space in IDS.	24
Figure 3	The vowel space, defined by F1 and F2 in Bark, with the vowel quadruples encompassing /i/, /a:/, /ɑ/, and /u/ in IDS to 11-month-olds, IDS to 15-month-olds, and ADS.	32
Figure 4	The mean COG of /s/ in IDS to infants at 11 months, IDS to infants at 15 months, and ADS.	35
Figure 5	The relative frequency of the F2Norm values and the DurNorm values in the corpus.	54
Figure 6	The F2Norm-DurNorm distribution of the /ɑ/ tokens and /a:/ tokens from the corpus.	55
Figure 7	The duration, F1 and F2 values of the four vowel sounds used in the discrimination experiment.	61
Figure 8	The mean relative-interest scores.	66
Figure 9	The sequence of visual events in the trials in the two-alternative categorization task.	79
Figure 10	Mean reaction times.	84
Figure 11	Mean pupil dilations.	86
Figure 12	The F2-duration distribution of the /ɑ/ tokens and /a:/ tokens from the corpus.	99
Figure 13	The F2 and the duration distribution of the /ɑ/ tokens and /a:/ tokens from the corpus.	100
Figure 14	The average final 2-cue-no- $\rho$ MoG.	111
Figure 15	The average final 1-cue-F2 and 1-cue-dur MoG.	113
Figure 16	Example of one neural network model.	115
Figure 17	Illustration of activity spreading.	116
Figure 18	Illustration of categorical perception.	118
Figure 19	Pacing through a neural network with two input layers.	122
Figure 20	One example of a final 2-cue network model.	128
