You will be contacted as soon as possible.
Table 1  The five pairs of lax vowels and tense vowels in Dutch.

Table 2  The words for the stimuli used to elicit the four target vowels /i/, /u/, /a:/, and /a/.

Table 3  A summary of the content of the corpus.

Table 4  The results from four ANOVAs making the comparison between IDS and ADS and between IDS-11 and IDS-15 with respect to the F1 and F2 of the vowels /i/, /u/, /a:/, and /a/.

Table 5  The average F0-median and F0-excursions in IDS to infants at 11 months, IDS to infants at 15 months, and ADS.

Table 6  The descriptive statistics of the vowels /a/ and /a:/ in Dutch IDS and the descriptives of the pooled distribution of all /a/ and /a:/ tokens in the corpus.

Table 7  The local maxima in the smoothed two-dimensional distribution with a density over 0.25.

Table 8  The stimulus sequences as used in the discrimination experiment.

Table 9  The results of the ANOVA.

Table 10  Acoustic measurements of the 12 tokens used in the categorization experiment.

Table 11  A summary of each of the four blocks in the categorization experiment.

Table 12  Analysis of reaction times.

Table 13  Analysis of pupil dilations.

Table 14  Analysis on 15-month-olds’ reaction times and CDI-score.

Table 15  Analysis on 15-month-olds’ pupil dilations and CDI score.

Table 16  The descriptive statistics of the vowels /a/ and /a:/ in the corpus of Dutch IDS.

Table 17  The MoG models’ frequency estimates of the categories /a/ and /a:/.

Table 18  The parameters of the categories /a/ and /a:/ for F2 and duration that describe the average locations of the categories in the Mixture of Gaussians (MoG) in the auditory space.

Table 19  The 2-cue-no-p MoG models’ perception quantified per quadrant.
Table 20  The estimates of the frequency of the categories /a/ and /a:/ by the neural network model. 126
Table 21  The parameters of the 2-cue neural network models for the categories /a/ and /a:/ that describe the location of the categories in the auditory space defined by F2 and duration. 127
Table 22  The 2-cue neural network models’ perception quantified per quadrant. 129
